Thursday 19 August 2010 Company Announcement

## HIGH GRADE RE-ASSAY OF >220 g/t GOLD AT DODGERS WELL

- Re-assay of a 1m sample (76-77m) within a mineralised zone of 36.10g/t (76-80m) in hole DWRC013 (previously reported in July 2010) has returned an assay of 220.50 g/t.
- This sample previously assayed 115.7 g/t gold, and formed part of an interval of 4m @ 36.10 g/t gold from 76m, within a larger interval of 9m @ 17.04 g/t gold from 76m.
- All of this assaying was by standard 40g (non screen) fire assay technique.
- A cyanide leach assay of the same high grade interval returned 227.94 g/t gold.
- The purpose of these re-assays is to obtain a more accurate guide as to the actual grade, due to coarse gold.

**These high grade re-assay results are encouraging and confirm the presence of coarse gold in the mineralised quartz vein in hole DWRC013.**

**Followup drilling of anomalous holes at Dodgers Well will be undertaken in September-October 2010.**

On behalf of the Board:

Chris Tomich,  
Managing Director

**Terrain Minerals Ltd** ABN: 45 116 153 514
