## Follow-up 9m @ 17.0 g/t Au High Grade Hole

---

Terrain Minerals Ltd will undertake an RC drill program at Dodgers Well to follow up on the high grade intersections from the previous drill program in 2010. Dodger's Well is located 20km north of Leonora in Western Australia.

A drill hole below hole DWRC013 is planned to test the down dip continuity of the 9m @ 17.0 g/t gold intersection. The intersection includes 1m @ 115.7 g/t gold from 77m and 3m @ 36.1 g/t gold from 78m.

Further drilling will also test a 6m intersection from surface @ 5.65 g/t gold in hole DWRC014.

Drilling will also test for the strike continuation of the Myrtle / Glen Lyon lode which averaged over 70 g/t when mined between 1897 and 1911.

A program of works has been submitted to DMP and is expected to be approved in May. Drilling contractors have been contacted for quotes and availability.

On behalf of the Board

A handwritten signature in blue ink, appearing to read "A. J. Coles".

Alan Coles  
Managing Director
