## About Terrain Minerals Ltd (ASX: TMX)

TMX is a Perth based exploration company with a number of gold and nickel projects in the Eastern Goldfields of Western Australia, including the advanced gold project at Bundarra.

### Bundarra (60 kms north of Leonora)

TMX has outlined JORC compliant resources of 320,000 oz of gold in a closely related cluster of deposits including: Wonder North, Celtic, Great Western, Bluebush and Black Cat. All the deposits remain open down dip and down plunge. Mining studies are currently in progress, including metallurgical testwork, pit optimisations, pit designs and mine scheduling. These mining studies are anticipated to be completed in the fourth quarter 2009.

On the adjoining Black Cat JV area (TMX 60%), a number of strong geochemical anomalies coincident with geological features, similar to the known deposits remain to be drill tested.

### Kambalda (15 kms east of Kambalda)

Aztec Dome Nickel prospect: An Induced Polarisation survey has recently been completed over the Aztec Dome. A number of anomalies have been identified and will require drill testing.

Coogee gold deposit (277,500t @ 3.9 g/t gold (35,000 oz))

Pit optimisation, pit design and mine scheduling studies are currently in progress and various development options are currently being considered

### Dodgers Well (30 kms north east of Leonora)

TMX has entered into an option to purchase agreement over this project. Preliminary work has identified high grade (up to 130g/t gold) quartz reef deposits. It is anticipated that the option to purchase will be exercised before the end of 2009, ahead of drilling programs in 2010.
