Lightning Gold Project: MRE Advancement on Track for July 2026 Maiden 'Starter' MRE - Due July 2026

Terrain Minerals Limited (ASX: TMX) ("Terrain" or the "Company") provides the following update on advancement activities at the Lightning Gold Project, part of its 100% owned Smokebush Gold & Silver Project, 350km north of Perth, Western Australia. With a Maiden 'Starter' Mineral Resource Estimate (MRE) targeted for July 2026, the Company has completed a series of technical and approvals-based activities designed to support a robust and timely resource statement.¹

Advancement Activities Currently Underway:

- **Flora and Fauna Survey** is currently underway over the whole tenements that house the Lightning Project M59/0796 and also the Wildflower target area E59/2234.
 - Report enables faster applications for drilling, program of work (POW).
- **Haul Road Application submitted**
 - Connecting mining lease to the gazetted Warriedar Coppermine Road.
 - Application permits usage for ore haulage, gas, power and water lines along the ~7km haul road.

Activities Required for Maiden Starter MRE:

- **Differential GPS (DGPS)** drill collar locations survey now completed, ensuring drill results are spatially reliable.
 - DGPS offers accuracy to centimetre- to decimetre-level.
- **Topographic Drone Survey** over M59/0796 – to commence this Quarter.
 - Accurately measure the shape, elevation, and surface features of the ground.

Other Recent Activities:

- **Metallurgical sampling first pass** (see ASX release 18 May 2026).
- **Diamond Drilling completed** (see ASX releases 20 April 2026).
 - Collecting Density and Orientation data for MRE.
- **Mining Lease Granted over Lightning** - M59/0796 (see ASX release 02 December 2025).

The activities outlined above represent the final technical and regulatory steps required before the Company can complete a maiden 'Starter' MRE at Lightning. With DGPS collar surveys completed, a topographic drone survey underway, and metallurgical sampling commenced, Terrain is systematically de-risking the path to a July 2026 resource statement. The Company will provide further updates as these workstreams are finalised.

¹ Refer to ASX release dated 15 April 2026 - "Lightning Delivers High-Grade Gold Across Expanded System" for the most recent drill results underpinning the July 2026 MRE target.

Project Context

The Lightning Gold Project is located within the Smokebush Project area in the Yalgoo Mineral Field, Murchison region of Western Australia. The project sits within a well-endowed gold district, with Vault Mining's Rothsay Gold Mine located approximately 10 km to the south and Capricorn Metals' Golden Range Project to the north.

ABOUT TERRAIN MINERALS LIMITED:

About Terrain Minerals

Terrain Minerals (ASX: TMX | FSE: T4Y) is a Perth-based exploration company with a diversified portfolio of 100%-owned projects across Western Australia and Queensland. The Company is focused on creating shareholder value through discovery, resource growth, and strategic partnerships.

Key Projects

✂ Smokebush Gold & Gallium Project

- Located in the Yalgoo Mineral Field, neighbouring Warriedar Resources' Golden Range Project (now Capricorn Metals) and 50 kilometres south of 29Metals' Golden Grove mine. Vault Mining's Rothsay Gold Mine lies only 10 km's away.
- Lightning Gold Prospect – RC drilling continues to deliver exceptional gold and silver grades with assays confirming significant mineralisation potential. Mining Lease now granted, first Mineral Resource Estimate (MRE) targeted for mid-2026 (refer ASX release 15 and 20 April 2026). Also refer to the above release for additional information.
- Wildflower Gold Prospect – Large 1,000m x 500m gold-in-soil anomaly with exciting first pass air-core and RC drilling indicates a strong structural setting near Rothsay. New IP survey identifies 3 exciting targets, which have been drill tested and Results are Now Pending, (refer to ASX release 4 March 2026 and 10 November 2025).
- Larin's Lane Gallium Prospect – Broad gallium intersections from 102 air-core holes across a 9 km x 3 km area. JORC Exploration Target defined over 5% of the 27 km² footprint. Metallurgical studies ongoing with MRIWA and WA Government support.

✂ Biloela Gold and Copper Project

- Covers 2,500 km² near Aeris Resources, Cracow Gold Mine and hosts multiple gold and copper targets, first identified by Newcrest.

✂ Lort River Rare Earths Project – (Refer to above release)

- Located 50 km's northwest of Esperance in the Albany-Fraser Belt where early drilling confirmed high-grade clay-hosted rare earths (Nd, Pr) with results comparable to leading Australian and Brazilian projects. Air-core drilling result are pending (refer to ASX release 13 March 2026).

✂ Carlindie Lithium & Gold Project

- Located 90 km's southwest of Port Hedland, strategically situated between Wildcat Resources and SQM.
- Large 15 km long soils program carried out in October 2025 with results now pending.

Project Pipeline & Growth Strategy

Terrain continues to actively review additional opportunities across gold, copper, industrial minerals, and battery/critical metals. While WA and Queensland remain the near-term focus, the Company is also assessing opportunities in base and specialty metals other economic commodities in Africa, Europe, Asia and the Americas.
