# Cautionary Statements & Disclaimer

This presentation has been prepared by Terrain Minerals. It should not be considered as an offer or invitation to subscribe for, or purchase, any securities in Terrain Minerals, or as an inducement to make an offer or invitation with respect to those securities in any jurisdiction.

This presentation contains general summary information about Terrain Minerals. The information, opinions or conclusions expressed in the course of this presentation should be read in conjunction with Terrain Minerals' other periodic and continuous disclosure announcements lodged with the ASX, which are available on Terrain Minerals' website. No representation or warranty, expressed or implied, is made in relation to the fairness, accuracy or completeness of the information, opinions and conclusions expressed in this presentation.

This presentation includes forward looking information regarding future events, conditions, circumstances and the future financial performance of Terrain Minerals. Often, but not always, forward looking statements can be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include statements regarding plans, strategies, objectives of management, anticipated production or construction commencement dates, expected costs or production outputs. Such forecasts, projections and information are not a guarantee of future performance and involve unknown risks and uncertainties, many of which are beyond Terrain Minerals' control, which may cause actual results and developments to differ materially from those expressed or implied. Further details of these risks are set out below.

All references to future production or production guidance made in relation to Terrain Minerals are subject to the completion of all necessary feasibility studies, permit applications and approvals, construction, financing arrangements and access to the necessary infrastructure. Where such a reference is made, it should be read subject to this paragraph and in conjunction with further information about the Mineral Resources and Ore Reserves, as well as any Competent Persons' Statement included in the periodic and continuous disclosure announcements lodged with the ASX. Forward looking statements in this presentation only apply at the date of issue. Subject to any continuing obligations under applicable law or relevant stock exchange listing rules, in providing this information Terrain Minerals Limited does not undertake any obligation to publicly update or revise any of the forward looking statement or to advise of any change in events, conditions or circumstances on which any such statement is based.

There are a number of risks specific to Terrain Minerals and of a general nature which may affect the future operating and financial performance of Terrain Minerals and the value of an investment in Terrain Minerals including, but not limited to, economic conditions, stock market fluctuations, commodity demand and price movements, access to infrastructure, timing of environmental approvals, regulatory risks, operational risks, reliance on key personnel, reserve and resource estimations, native title and title risks, foreign currency fluctuations and mining development, construction and commissioning risks.

All currency amounts are in Australian dollars unless otherwise stated.

## **No new information**

This presentation does not contain any new data, results or information, with all references clearly notated within the relevant page or section of the presentation and documented within the list that follows on this page. Terrain Minerals is not aware of any new information or data that materially affects the information included in the original market announcements referred to in this presentation, and that all material assumptions and technical parameters have not materially changed.

## **Photographs**

Photographs used in this presentation which do not have descriptions are for illustration purposes only and should not be interpreted to mean that any person shown endorses the presentation or its contents, or that the assets shown in them are owned by Terrain Minerals.

## TERRAIN MINERALS

# Why Terrain Minerals?

Terrain provides investors with early exposure to its high-quality flagship Smokebush Gold Project, along side advancing its existing portfolio of large-scale opportunities in critical and precious metals that underpin current and future technologies.

Investors are gaining access to a proven, disciplined and staged exploration approach aimed at delivering cost-effective value creation, while de-risking future development.

All projects located in Tier 1 jurisdictions in Australia (WA & QLD).

## Smokebush Project – Lightning & Wildflower Gold & Larin's Lane Gallium

- **Lightning – Gold/Silver** – Induced polarisation (IP) model unlocking the Lightning Project. (8)
  - Exceptional high grade drill results continue across the Lightning Project – Planning for further drilling underway. (17)
  - Mining Lease Granted – Targeting a Maiden 'Starter' Mineral Resource Estimate (MRE) – July 2026.
- **Wildflower Area** – 3 large IP targets tested with similarities to Lightning Project. (14, 20)
  - RC Drilling 13 holes for 2,276m completed – **Results Now Pending.**
- **Larin's Lane – Gallium/REE** – JORC compliant exploration target (5) & MRIWA Metallurgical Results Due Q2 2026. (4)

## Biloela (Qld) Project – Copper & Gold – 2,462km<sup>2</sup> package (9)

- Historic copper-gold mines identified, with seven priority drill targets defined.
- Independent review confirms VMS, porphyry copper-gold and epithermal gold systems present.

## Carlindie Project – Lithium & Gold – 1,135km<sup>2</sup> (partially granted)

- Soil sampling along 15km structure completed with 4km area re-tested for Gold – **Results Now Pending.**

## Lort River – Rare Earths

- Neodymium (Nd) & Praseodymium (Pr) grades compare very favourably with leading Australian and Brazilian clay-hosted deposits.
- 33 Air-core drill holes completed – **Results Now Pending.** (21)

TERRAIN MINERALS

# Smokebush Project

Lightning, Wildflower & Larin's Lane

Located 350 kilometres north of Perth.

Proven to host high-grade Clay/Oxide Gallium and multiple advanced Gold targets.

Benefits from close proximity to existing mining and related infrastructure.

Mining Lease Granted over Lightning Project.

Maiden Mineral Resource Estimate (MRE) due July 2026, with Mining Studies to follow after.

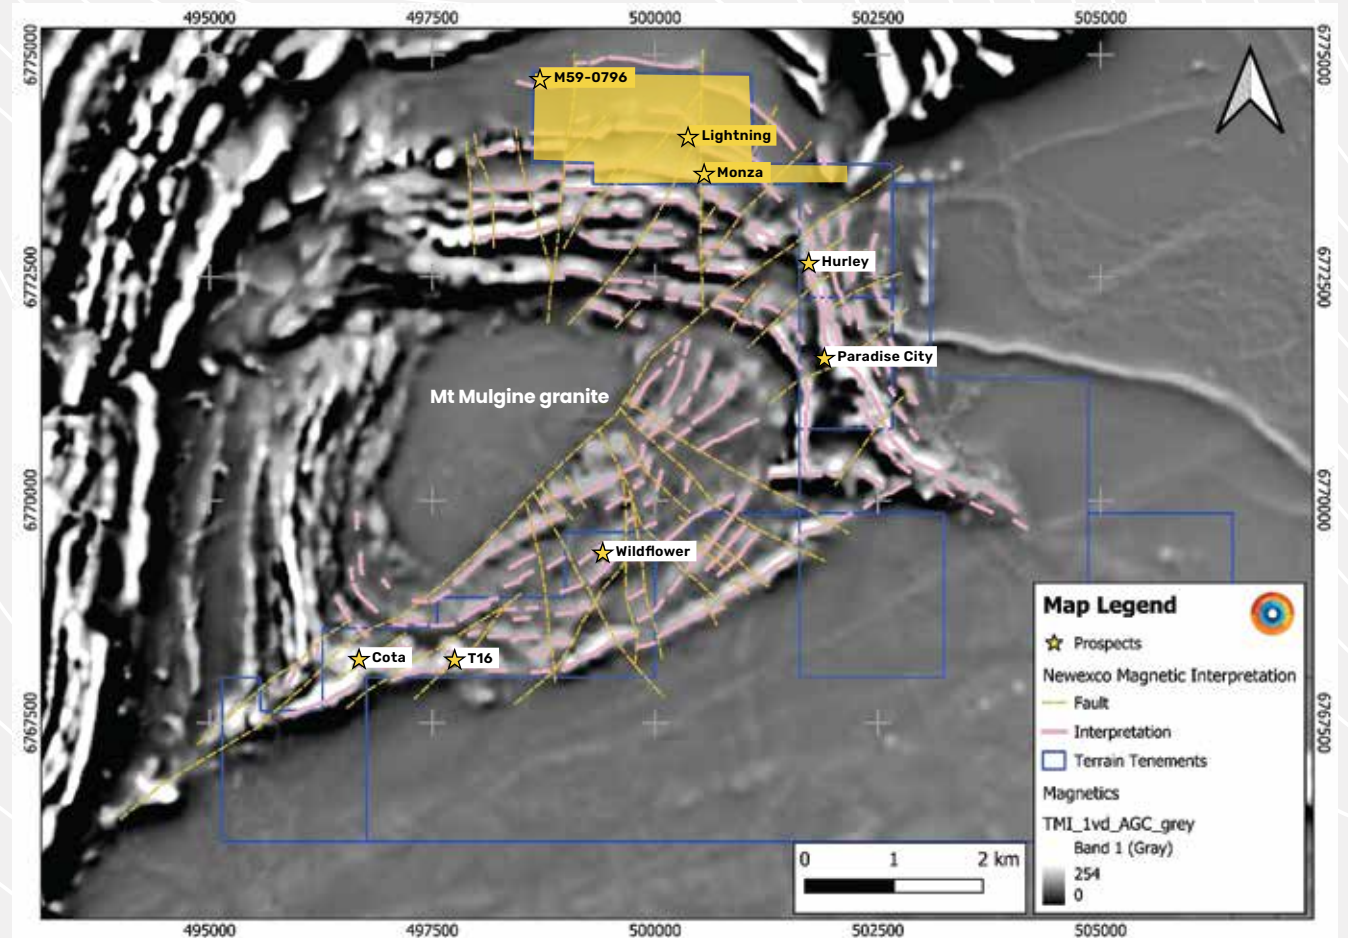

Planning underway for an expanded RC drilling campaign, targeting commencement in June 2026.

 (18)

TERRAIN MINERALS

# Smokebush Project | GOLD

## Lightning Project - Gold/Silver

### Key Investment Highlights

- Highly successful 5,309m RC drilling campaign completed in March 2026, confirming continuity of high-grade gold mineralisation along strike and at depth.
- Maiden Mineral Resource Estimate (MRE) remains on track for July 2026.
- Four diamond core holes completed in the first quarter, further de-risking the project.
- Mining Lease granted over the Lightning area. (M59/0796)
- Assays from the bottom of hole indicate the potential emergence of a third mineralised structure.

### Selective drill results from Lightning: (8, 11, 12, 13, 17)

- 11m @ 6.03 g/t Gold + 43.5 g/t Silver from 75m (SBRC063).
- 22m @ 2.71 g/t Gold + 15.79 g/t Silver from 105m (SBRC074).
- 17m @ 3.43 g/t Gold + 17.88 g/t Silver from 147m (SBRC080).
- 8m @ 6.87 g/t Gold from 76m (SBRC095).
- 7m @ 7.08 g/t Gold from 217m (SBRC106).
- 5m @ 3.26 g/t Gold from 196m (SBRC114).
- 11m @ 2.61 g/t Gold from 86m (SBRC116).
- 13m @ 8.13 g/t Gold from 122m (SBRC087).

### Next Steps (10, 15)

#### Continue RC drilling throughout 2026, (using IP model) targeting:

- Lightning Extensions and Repetition.
- New Discoveries within granted Mining Lease and across the project area.
- New IP Survey being planned over western side of the granted Mining Lease.
- Lightning Metallurgical studies are underway.
- Planning under way to commence mining studies, once MRE is released.
- Start discussions with potential mining contractors and processing facilities.
- Silver assays submitted - **Results Now Pending.**

- Long section of the Monza trend Gold mineralisation showing drill hole pierce points with grade (g/t) x width, significant intersections (note 1) and minor historical workings.
- Drilling to date indicates that the Monza trend mineralisation currently has a strike length of over 700 metres (note 2) and remains open along strike and at depth.
- Potential for new parallel structures/shear zones. (3, 6 & 7)
- Initial modelling suggests the higher-grade (>20-gram x metres) Gold mineralisation has a northward plunge.
- The majority of holes in the current drilling campaign have been designed to intersect multiple structures.
- 15 April 2026 drill results data not included.

Notes:

1. As reported by Terrain Minerals via the ASX Market Announcements Platform on 18 December 2019, 3 March 2020, 12 October 2020, 19 July 2021 and 14 November 2023.
2. As reported by Terrain Minerals via the ASX Market Announcements Platform on 20 December 2024.

## Lightning Gold/Silver Project (8, 12)

Image 1

Schematic plan of the Lightning project area showing drill hole pierce points with grade (g/t gold) x width superimposed over the open-file Western Australian government aeromagnetic data. (19)

Early modelling suggests a north-trending shear zone acts as a Gold fluid pathway with east-west high magnetic lithological units are acting as traps for thicker, high-grade mineralisation.

The northern areas of the Lightning trend, as identified in the diagram, require follow-up infill drilling and represent a priority gold target area.

**Ga**  
Gallium

TERRAIN MINERALS

# What is Gallium?

Gallium is classified as a critical metal by the USA, United Kingdom, Japan, European Union and Australia.

Main applications are in defence, semi-conductors and computer chips, electronic circuitry and photovoltaic cells, lasers, NdFeB magnets and light emitting diodes (LED's).

Presently, 98% of global supply is ex-China. USA, Japan and European semi-conductors manufacturers are actively encouraging a more geographically balanced supply chain.

Terrain is rapidly expanding its Gallium focus to dovetail with the exponential growth of quantum computing and generative AI (and the associated demand for semi-conductors).

Gallium chips and other electrical components draw less power, switch faster and operate at higher temperatures.

Demand By Application (2015-2035), t Ga

Lightning / Wildflower & Larin's Lane

## Forward Program

TERRAIN MINERALS

# Summary

## **SMOKEBUSH – GOLD/SILVER PROJECT & GALLIUM (REE)**

Located in the historic WA Mid-West mining district, the region is home to numerous historic and active mines.

## **LIGHTNING (GOLD/SILVER) PROJECTS – Key Investment Highlights** (11)

- **High targeting rate:** Multiple High grade intersections from recent drilling campaigns. (12, 17)
- **Scalable system:** Early modelling points to major north-trending shear zones and East–West traps for thick mineralisation.
- **Silver upside:** Strong silver grades already seen, with more assays pending.
- **Next steps:** New IP survey, Continue RC drilling campaigns (expansion & discovery). (15)
- **Mining tenement granted:** Area includes the Lightning Prospect.
- **Resource growth:** On track to define a Mineral Resource Estimate in July 2026, at Lightning.
- **Next catalysts:** Ongoing drilling, MRE, Mining Studies and Silver Assays Results.

## **WILDFLOWER (GOLD) PROJECT** (14)

- Highly Successful IP survey identifies multiple targets.
- 13 holes for 2,276m RC drilling – **Results Now Pending.** (20)

## **LARIN'S LANE (GALLIUM/REE) PROJECT**

- JORC compliant exploration target released November 2024. (5)
- Metallurgical Study extended – **Results Now Pending Q2 2026.** (4)

## **BILOELA (QLD) PROJECT – COPPER & GOLD**

- Highly prospective exploration package 2,462km<sup>2</sup> with exploration activities to commence Q3 2026. (9)

## **CARLINDIE PROJECT – (PILBARA REGION)– LITHIUM & GOLD (partially granted)**

- Soil sampling along 15km tectonic structure + 4km for Gold – **Results Now Pending.**

## **LORT RIVER – RARE EARTHS – Drilling Results Now Pending**

- Neodymium (Nd) & Praseodymium (Pr) grades compare very favourably with leading Australian and Brazilian clay-hosted deposits.

TERRAIN MINERALS

# Appendix

TERRAIN MINERALS

# Biloela Project

Located 400 kilometres northwest of Brisbane.

Exploration permits totalling 2,462km<sup>2</sup> of tenure.

Seven historic Copper-Gold mines reported within Biloela Project. (refer to ASX release on 21 June 2023)

Ten additional mineralisation occurrences reported across the project.

Independent review confirmed volcanogenic massive sulphide (VMS), porphyry Copper-Gold and epithermal Gold mineral systems present within the project area.

TERRAIN MINERALS

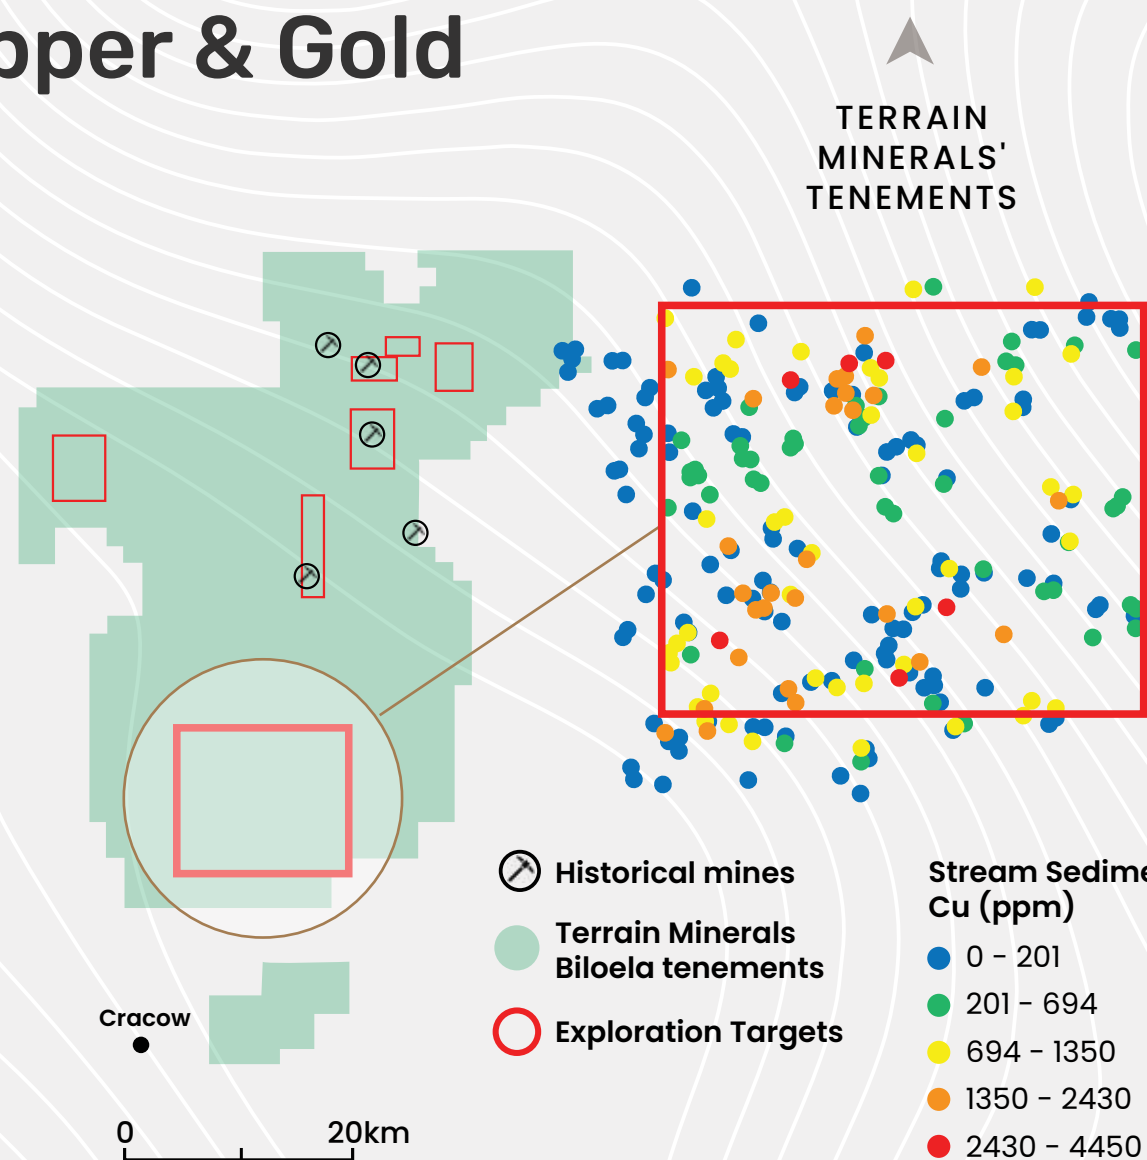

# Biloela Project | Copper & Gold

The Biloela Project lies 13 kilometres north of the Cracow Gold Mine in the Glandore and Theodore region of Queensland.

Extensive ~2,500km<sup>2</sup> tenement area, first identified by Rio Tinto, Gold Fields Limited and Newcrest Mining Limited.

The northwest-trending faults within the north-eastern part of the Biloela Project are similar to those present at the Cracow Gold Mine and are considered the most prospective for epithermal-style Gold mineralisation.

Terrain's internal geological team has identified 7 potential Copper and Gold sites.

TERRAIN MINERALS

# Carlindie Project

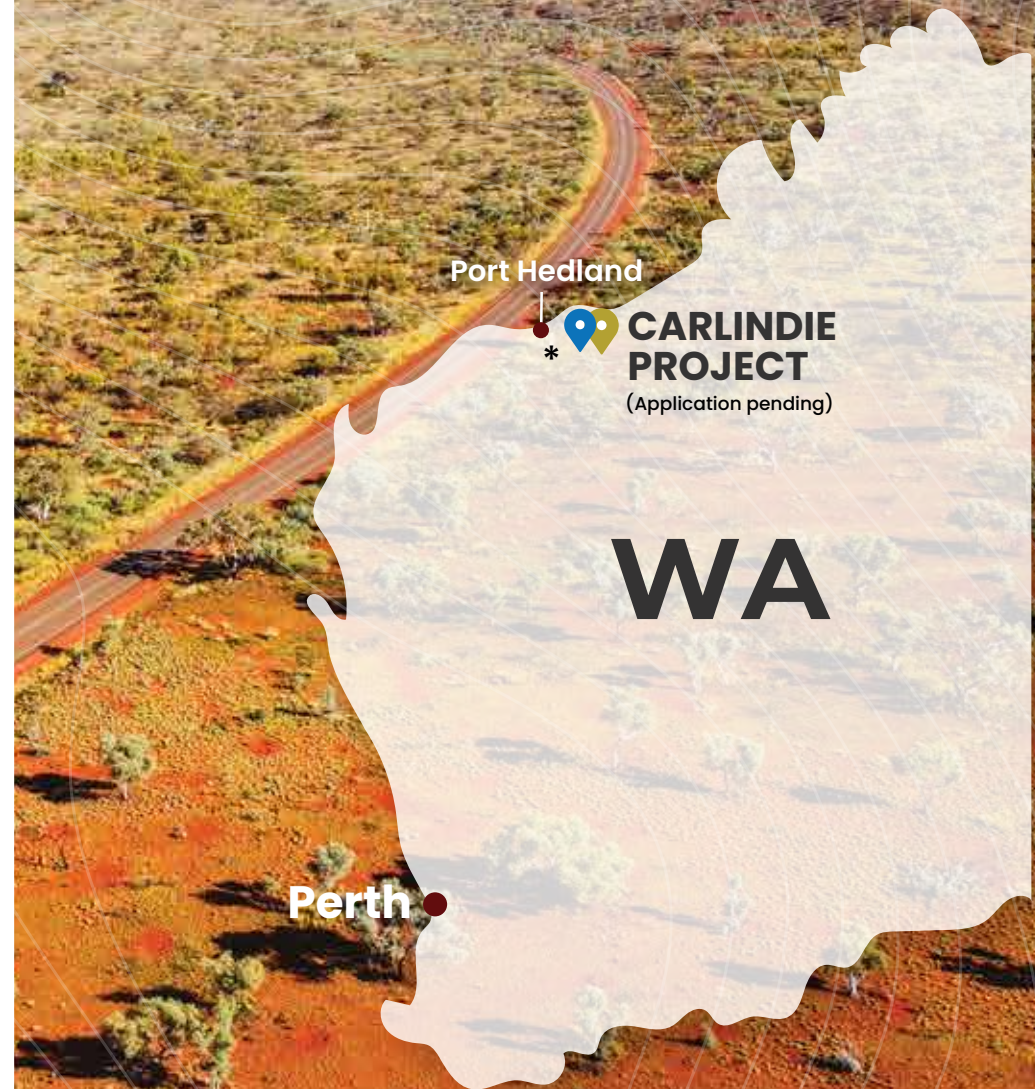

Located 90 kilometres south-east of Port Hedland Western Australia.

Tenement applications cover ~ 1,135km<sup>2</sup>.

Along strike of Wildcat Resources, Tabba Tabba and Bolt Cutter Lithium Project.

Neighbours SQM, Pilbara Lithium Project, and is in the same mineral province as Northern Star's Hemi Project.

\*Several areas still pending grant:  
No additional costs until application is granted.

TERRAIN MINERALS

# Carlindie Project | Lithium & Gold

Located 90km S/E of Port Headland & covering ~1,135 km<sup>2</sup>,  
~50km N/E of Pilbara Minerals, Pilgangoora mine.

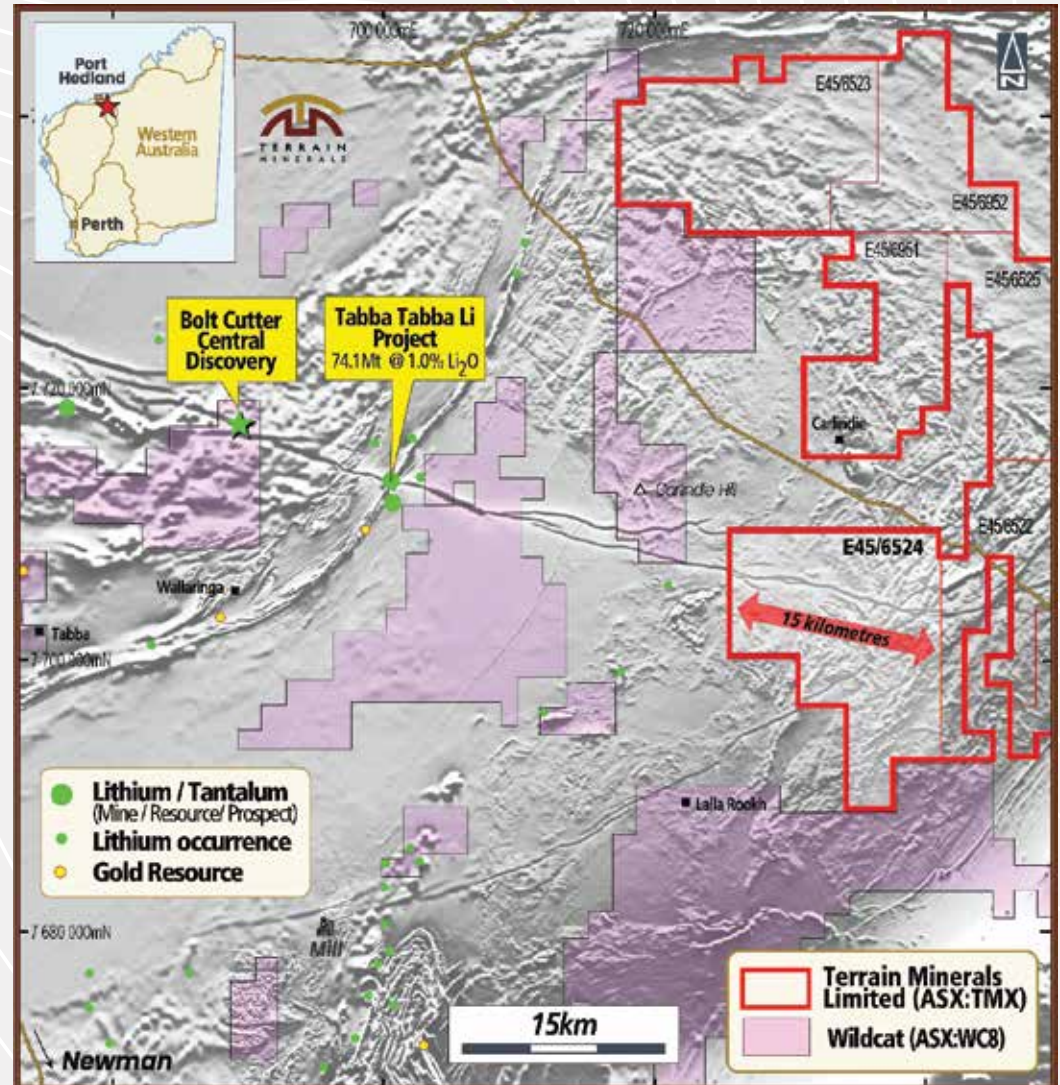

Terrain has completed a 400 metre x 400 metre soil sampling program, collected 822 samples over 15km long tectonic structure, with 4km section sent back for gold assays (see diagram E45/6524).

Additional field work to commence as tenements are granted, including further studies, soil sampling and follow up drilling.

Desktop studies have identified key areas fitting to Terrain's internal geological modelling.

Terrain's Carlindie Project is under 3 metres of soil cover and in a favourable geological setting within WA's premier Lithium district.

\*Application pending

TERRAIN MINERALS

# Carlindie Project | Lithium & Gold

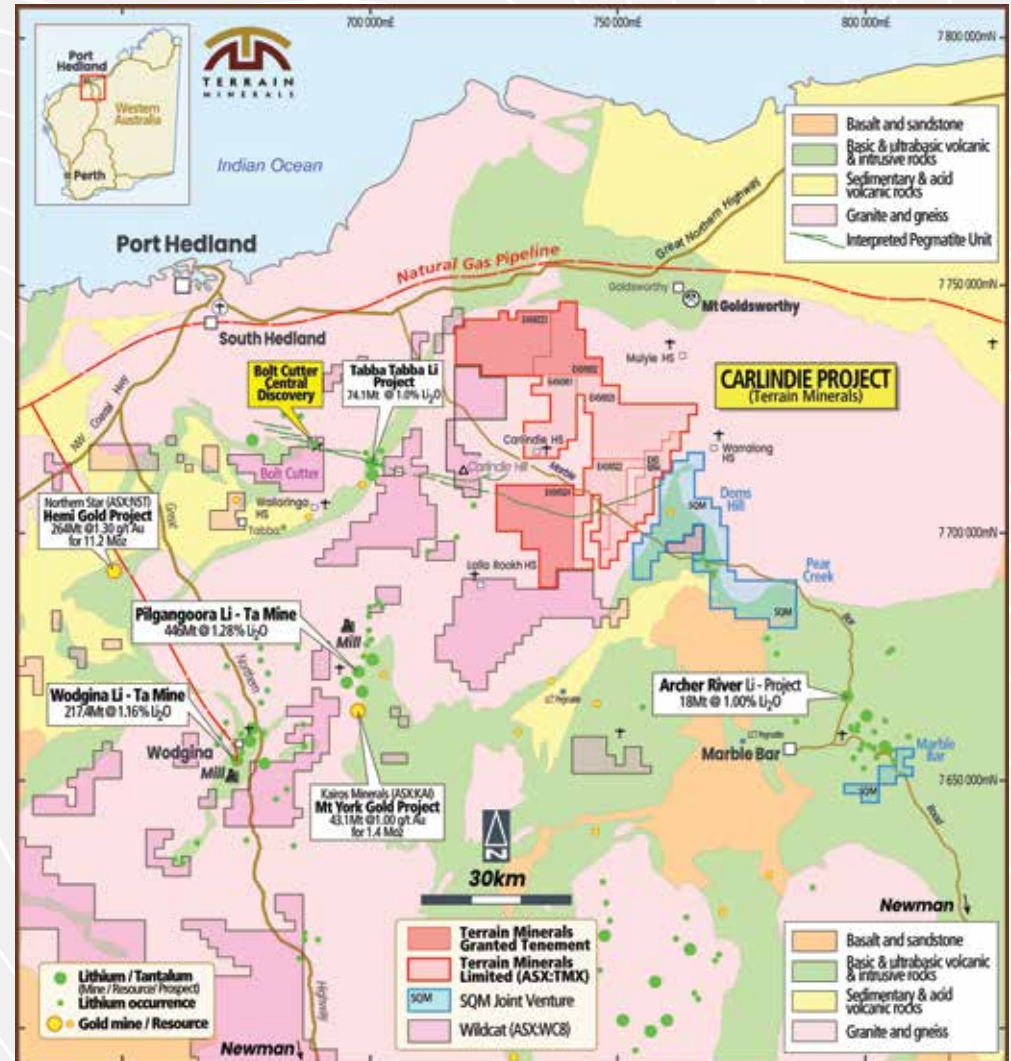

Several tenements have recently been granted with the remaining applications expected to be granted in 2026.

Located in the same mineral province as the Northern Star's Hemi Project.

Advanced Machine Learning study now completed.

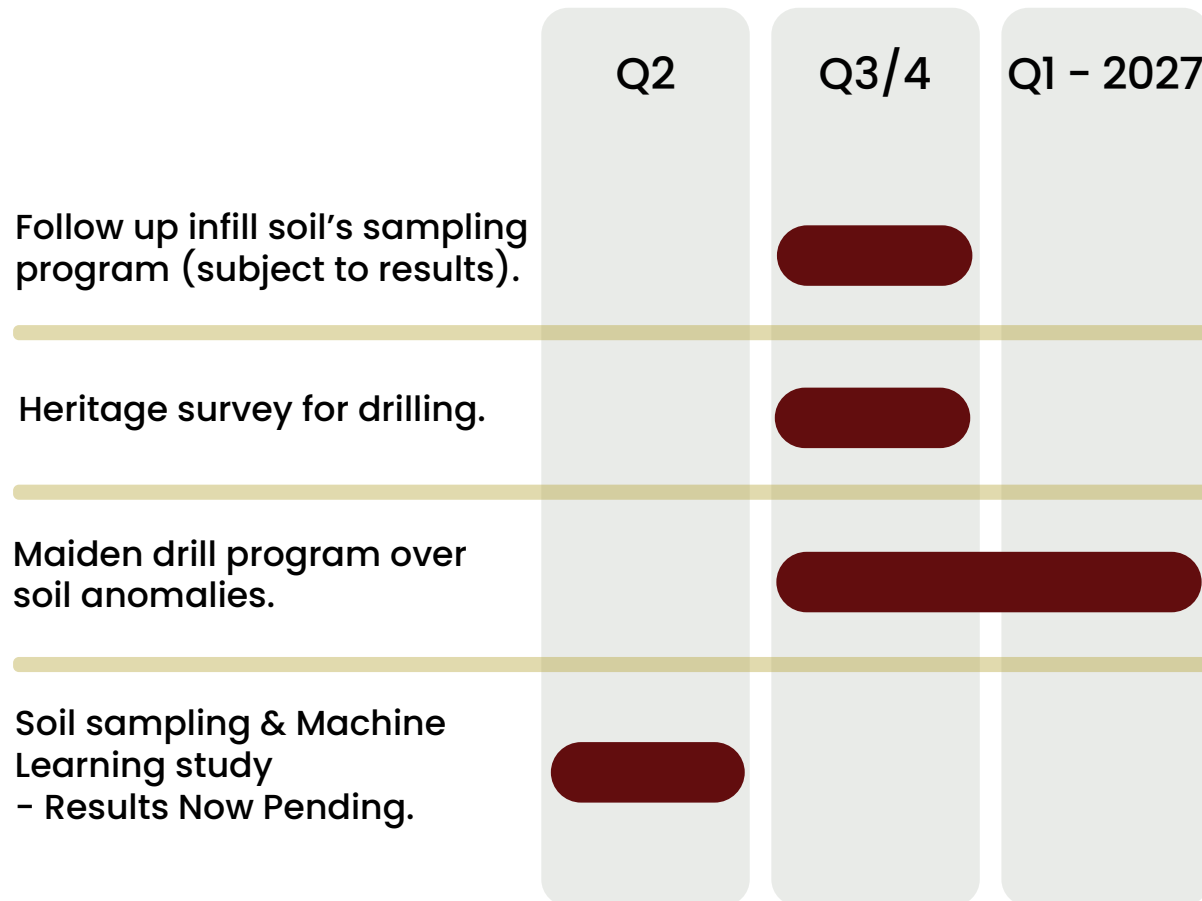

Majority of tenure under shallow soil cover and has been locked up within major companies for decades with limited exploration conducted.

Results from the soil sampling campaign are pending and will be released along side the Machine learning study.

TERRAIN MINERALS

# Carlindie Project Forward Program

TERRAIN MINERALS

# Lort River Project

Located 650 kilometres southeast of Perth and 50 kilometres N/W of the town of Esperance WA.

81km<sup>2</sup> of tenure, is located in the Southern part of the Albany Fraser belt.

Tenure is located within a lightly explored area of the belt due to being situated on arable farming land.

REE target appears to sit on the edge of a unique ~3km by ~5km mafic intrusive feature.

**LORT RIVER  
PROJECT**

Perth

Esperance

TERRAIN MINERALS

# Lort River Project | Rare Earths

January 2025 RC drilling has potentially identified a new high grade REE clay regolith basin target covering 66 km<sup>2</sup> with results that appear to be of a magnitude to previous results in the area. (7,16)

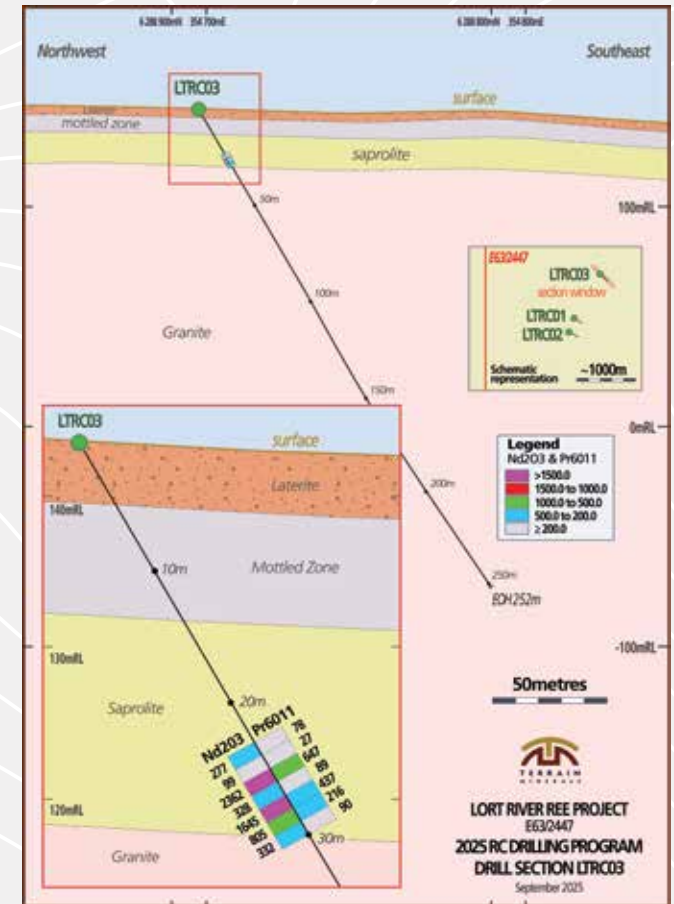

## Significant intersections from the reconnaissance drilling: (7)

- 8 metres @ 4,049ppm TREO from 23 metres down hole (LTRC03), including:
- 1 metre @ 9,840ppm (or 0.98%) TREO from 25 metres down hole and
  - 1 metre @ 9,026ppm (or 0.90%) TREO from 27 metres down hole.

Neodymium (Nd) and Praseodymium (Pr) grades at this level compare extremely favourably to existing Australian and Brazilian clay-hosted Rare Earth projects.

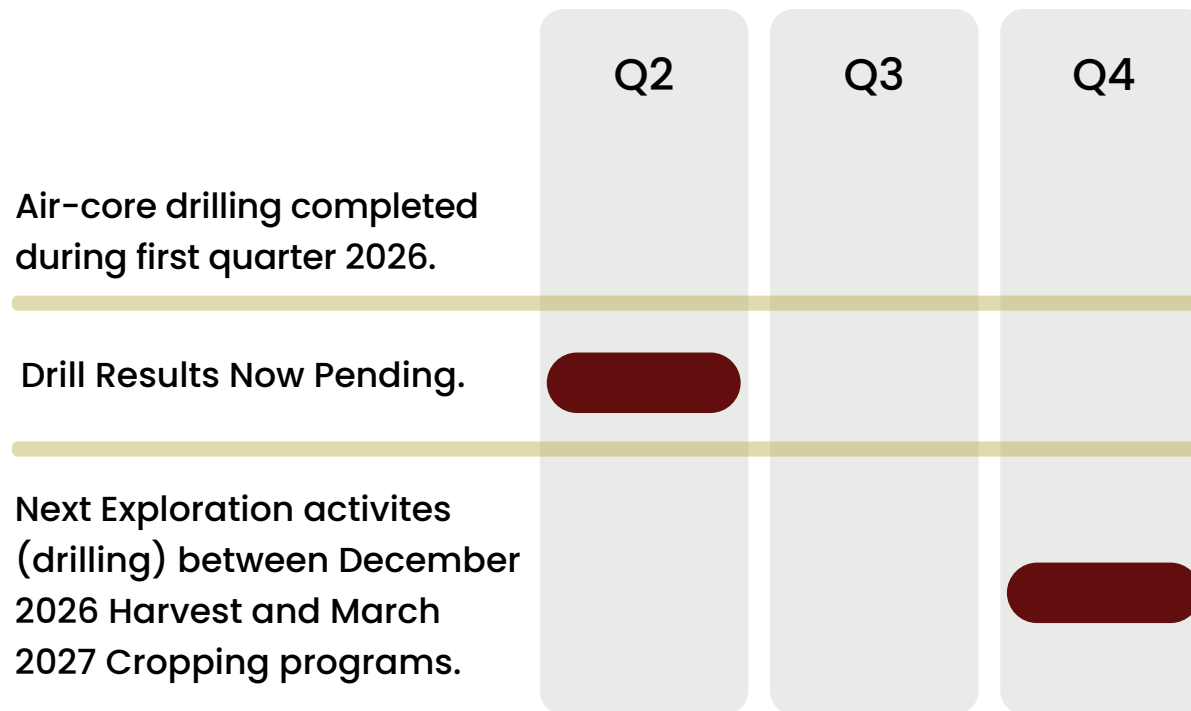

## Exploration activities during the quarter: (21)

- 33 Air-core drill holes for 901 metres.
- **Drill Results Now Pending.**

# Competent Person's Statement & References

### Competent Person's Statement

The information in this presentation that relates to exploration results within Terrain Minerals' tenements has been compiled by Mr Benjamin Bell, consultant to Terrain Minerals. Mr Bell has over 20 years' experience in exploration and evaluation of mineral properties throughout Australia and overseas. Mr Bell is a Member of the Australian Institute of Geoscientists and has sufficient experience that is relevant to the style of mineralisation and types of deposits under consideration and to the activities that he is undertaking to qualify as a Competent Person as defined in the JORC Code 2012. Mr Bell has consented to the inclusion of statements made by him, in the form and context in which they appear within this presentation and has not withdrawn consent prior to the release of this presentation.

### Competent Person's Statement

The information in this report that relates to Exploration Results for the Smokebush Project are based on information compiled by Michael Gazley, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Gazley has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Gazley consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.

### Competent Person's Statement

The information in this report that relates to Exploration Results for the Lort River Project are based on information compiled by Karen Gilgallon, who is a Member of the Australian Institute of Geoscientists. Ms Gilgallon has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Ms Gilgallon consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.

### Competent Person's Statement

The information in this report is based on information compiled for Lort River by Mr. Ben Jupp who is a Member of the Australian Institute of Geoscientists (AIG). Mr Jupp is not a shareholder or options holder of Terrain Minerals Limited, nor does Mr Jupp have any financial interest in Terrain Minerals. Mr Jupp is Principal Consultant (Geology) at SRK Consulting (Australia) Pty Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Jupp consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

TERRAIN MINERALS

# Directors & Management

## Justin Virgin

### EXECUTIVE DIRECTOR

Mr Virgin has over fourteen years' experience as a ASX Director of listed exploration companies as well as Sixteen years of experience in the financial services and Securities industry with expertise in providing a wide range of financial services which includes capital raisings, promotion, providing general corporate advice listed small-cap companies and other investment advice involved in negotiations, mergers, acquisitions and valuations.

Mr Virgin also has over ten years of onsite mining experience operating in remote and isolated sites throughout WA and NT on site. His experience covers both a board and project level, project acquisition and sale negotiations, mine closures and rehabilitation work as well as extensive preventative maintenance planning and execution on onsite mobile fleet and of exploration program.

Mr Virgin studied Marketing before completing a Master of Business Administration (MBA) from Edith Cowan University in Western Australia. He also holds trade qualifications as an Automotive Electrician and Certificate of Trade Studies and has qualifications in Advanced Electrical & Hydraulic Systems.

## Johannes Lin

### NON-EXECUTIVE DIRECTOR

Mr Lin has over a decade of entrepreneurial and management experience across real estate, technology, and consumer sectors.

He is a Director of Windsor Capital Pte Ltd, a private investment holding group with a diversified portfolio in commercial leasing and hospitality development across Asia. He played a key role in the restructuring of SGX Listed Enzer Holdings Limited and has been involved in real estate development projects in Singapore and the Philippines, alongside operating multiple F&B ventures in Singapore and China. He is also deeply engaged in software development, with a focus on AI and Business Intelligence, and holds a Bachelor of Commerce (Accounting and Finance) from the University of Western Australia.

## Jason MacDonald

### NON-EXECUTIVE DIRECTOR

Mr MacDonald is a qualified legal practitioner, holding a Bachelor of Laws and a Bachelor of Commerce, with a double major in Accounting and Finance from the University of Western Australia. He has practiced in both mining corporate/commercial and commercial litigation areas.

Mr Macdonald has been a director of several public and private resource companies. He has a diverse range of corporate, equity capital market and mining related experience.

## Benjamin Bell

### HEAD OF EXPLORATION

With over 30 years of experience in the resources sector, Benjamin is a highly accomplished geophysicist with a strong track record of mineral discovery and value creation within the Australian mining industry. He currently serves as Head of Exploration, bringing strategic leadership and deep technical expertise to the role.

In 2009, Benjamin successfully led Ausgold Limited's public listing on the Australian Stock Exchange. Under his leadership, that company discovered the 2-million-ounce Katanning Gold Project, a milestone that earned Ausgold a finalist nomination for Explorer of the Year at the 2011 Australian Mining Prospects Awards.

Benjamin holds a Bachelor of Science from Macquarie University, a Master in Mineral Exploration from Curtin University, and a Master of Business Administration with Distinction from the University of Wollongong. He is currently pursuing a Master of Artificial Intelligence, reflecting his commitment to innovation and continuous learning. He is also a member of the Australian Institute of Geoscientists.
