

ASX Announcement

21 January 2022

ABN: 45 116 153 514

ASX: TMX

Quarterly Activities Report: December 2021

Terrain Minerals Limited (ASX: TMX) (Terrain) is pleased to provide the following update on its activities for the December 2021 quarter:

HIGHLIGHTS:

Wild-viper - Gold Exploration Project

- Geologists conducted two field trips during the quarter
- Three newly identified areas assessed - mapped and sampled
- Market will be updated once results have been analysed

Smokebush – Gold Exploration Project

- Recent desk top reviews have identified that additional field work is required, to enable better targeting for the next stages of drilling
- Additional field activities are being planned, and include more detailed mapping to assist to unravel the structural complexities around the Monza area
- Terrain is also exploring several options regarding taking his project forward

Corporate Update

- Terrain held 2 million shares in RED5 Ltd at end of December Quarter
 - Issued at 19c – current value at 28c = \$560,000 AUD
 - Cash Dec Quarter \$1,035,000 + share investments at 28c = \$1,595,000
- Annual General meeting held on the 25 November 2021 with all resolutions passed
- New opportunities continue to be reviewed and advanced

Address: Suite 2, 28 Outram Street, West Perth WA 6005 **Postal:** PO Box 79, West Perth, WA 6872

T: +61 8 9381 5558 **E:** terrain@terrainminerals.com.au **W:** www.terrainminerals.com.au

Wild-viper Gold Exploration Project

Terrain geologists conducted two field trips to site during the quarter. Three new area have been examined and new maps have been generated with rock chip samples taken and submitted for assay. This is early-stage exploration work to assist with future exploration programs. The market will be updated once results has been assessed.

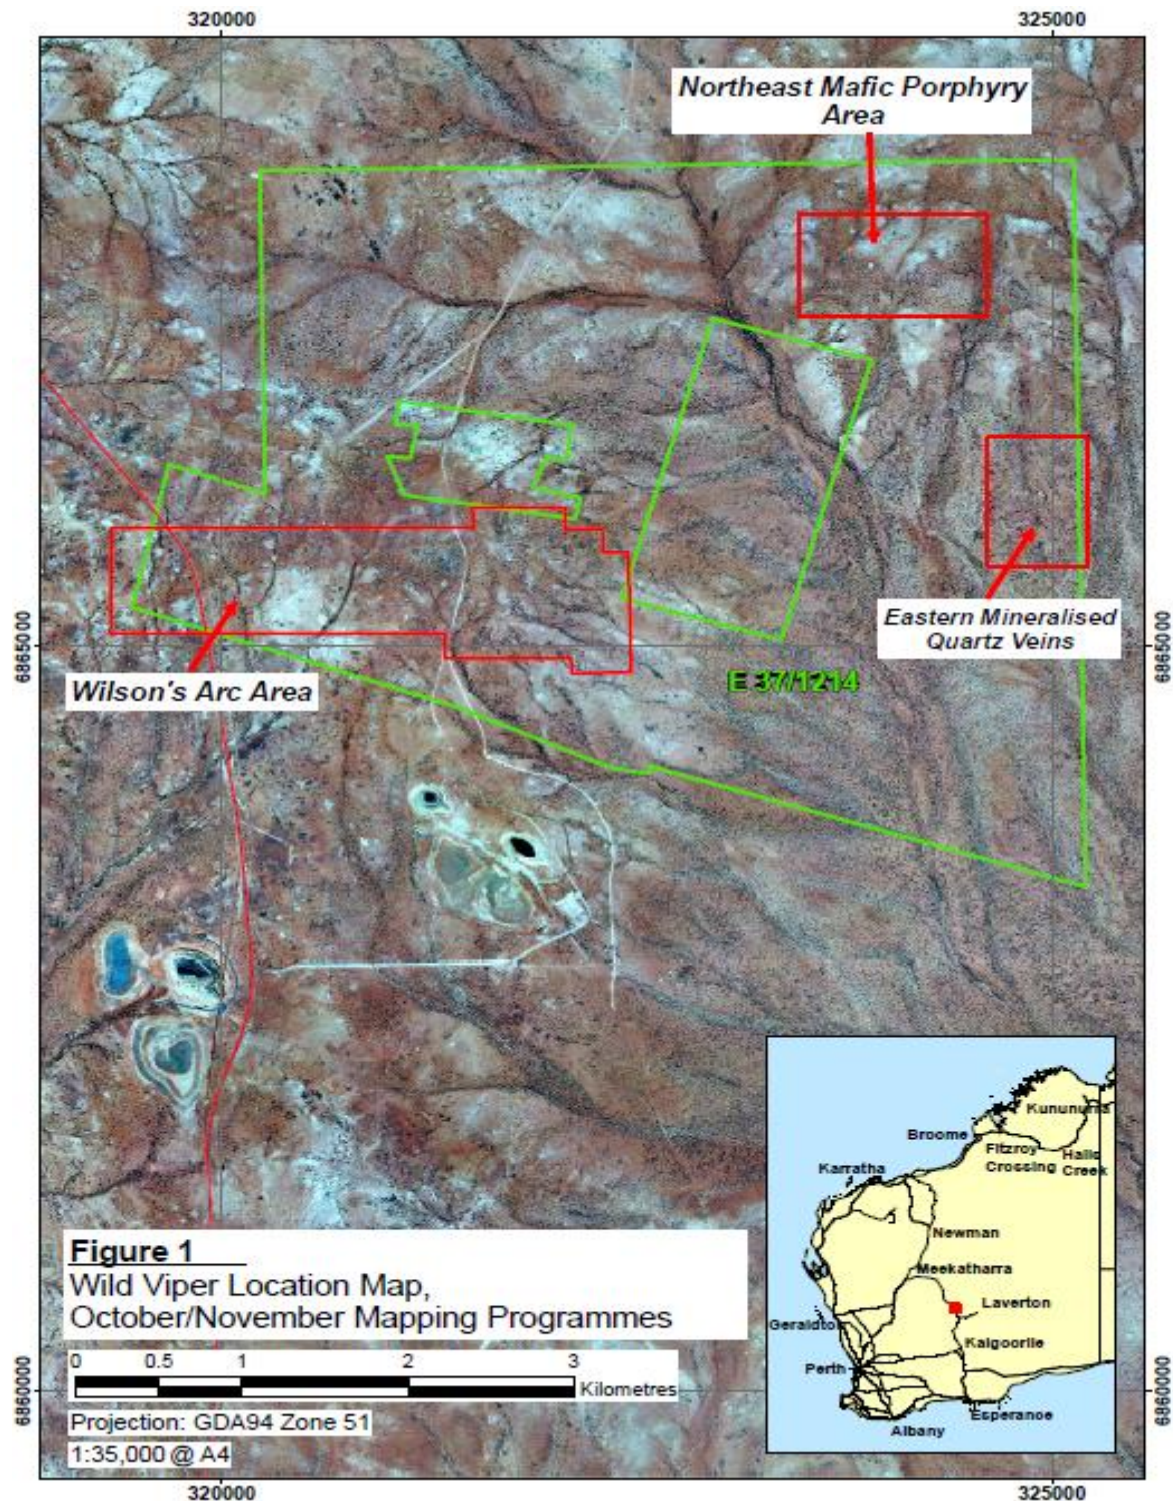

Diagram 1: Wild Viper Project

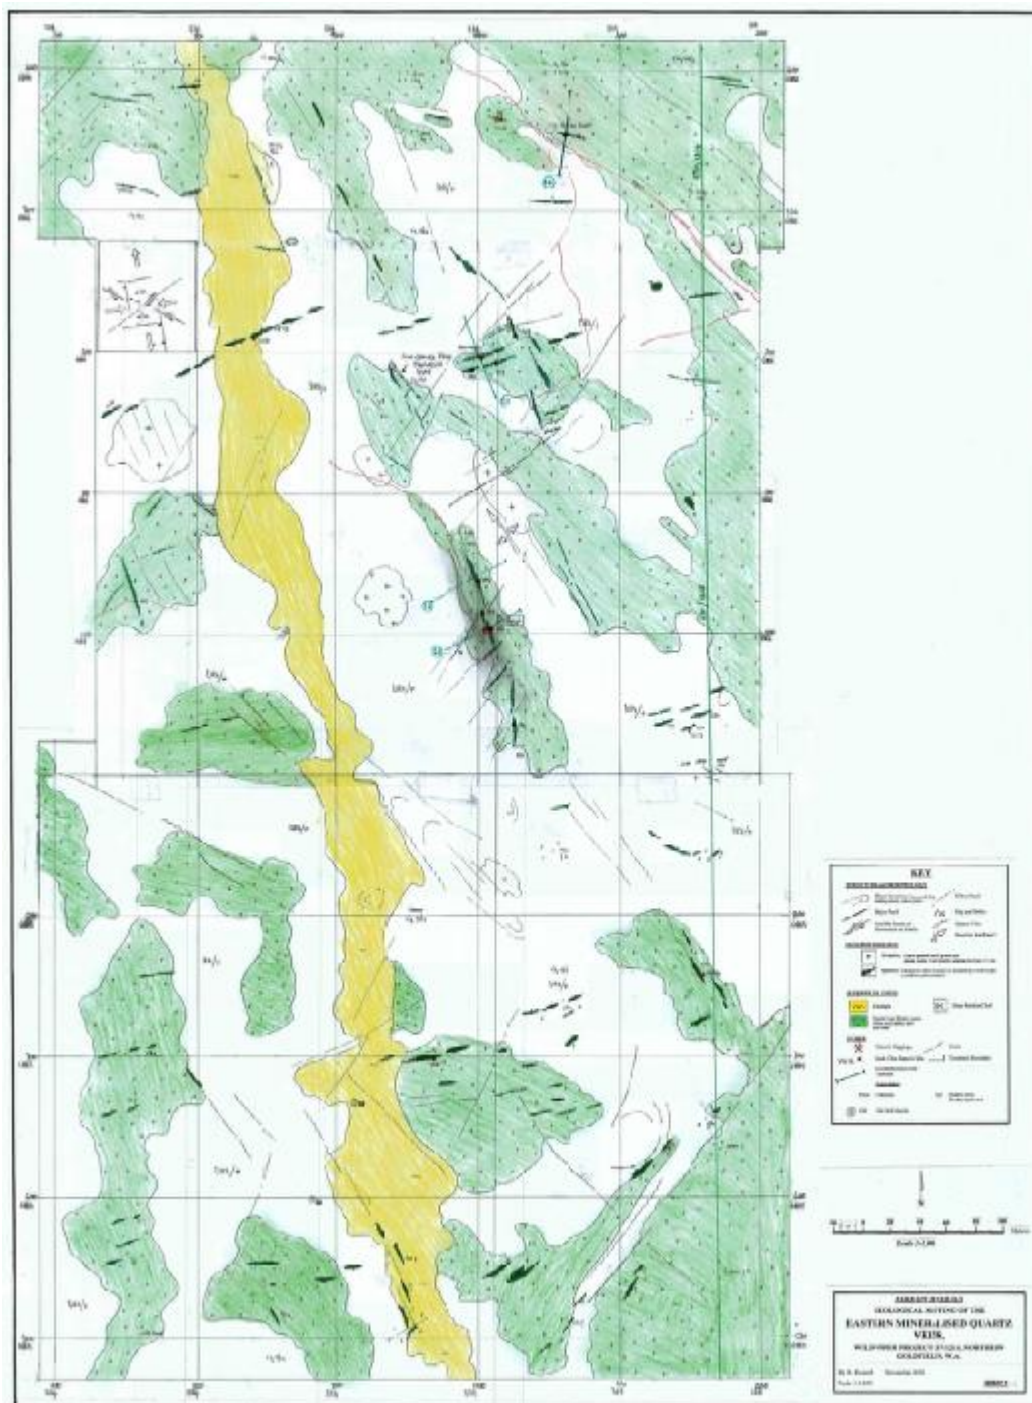

Diagram 3: Mapping and geological interpretation over the Eastern Mineralisation Quartz vein area.

Smokebush Gold Project

Positive Drilling Results Smokebush Gold Project

Terrain has previously released positive (first pass) drilling results from its Smokebush Gold Project.

First Pass Drilling over Monza (80% TMX) has successfully extended the strike of gold mineralisation by a further **400 meters** to define **700 meters** of mineralised strike extent within Tenement P59/2128.

New Area: Monza North drilling identified a new offset mineralised gold structure that is open along strike and down dip (refer to diagram 5 & 6).

Best New Gold (Au) Results Include:

Monza (adjacent) – Strike extension 50m spaced line results

- **1m @ 1.62 g/t Au** from 64m, **3m at 3.62 g/t Au** from 73m, **4m at 2.71 g/t Au** from 89m, & **1m @ 0.58 g/t Au** from 105m, **SBRC013**
- **2m @ 0.8 g/t Au** from 59m, **SBRC018**
- **3m at 4.86 g/t Au** from 135m, **SBRC023**

Monza Extension - 100m spaced line results (First Pass drilling)

- **2m @ 1.67 g/t Au** from 57m, **SBRC014**
- **1m @ 1.24 g/t Au** from 131m, & **2m @ 1.21 g/t Au** from 134m, **SBRC015**
- **3m @ 2.07 g/t Au** from 87m, **SBRC016**
- **2m @ 0.8 g/t Au** from 59m, **SBRC018**

Monza North - Drilling has identified a mineralised structural zone.

- **1m @ 0.83 g/t Au** from 37m, and **1m @ 0.81 g/t Au** from 53m, **SBRC019**
- **1m @ 0.54 g/t Au** from 74m and **1m @ 2.36 g/t Au** from 91m, **SBRC020**
- **3m at 1.53 g/t Au** from 39m, **SBRC021**

Paradise City (100% TMX)

- **1m @ 0.85 g/t Au** from 16m, & **1m at 1.18 g/t Au** from 29m, **SBRC025**
- **2m @ 0.64 g/t Au** from 66m, **SBRC026**

Note: (Downhole lengths, >0.5g/t, no internal waste)

The board is pleased to confirm that the drilling program was executed safely and professionally. In addition, logging confirms that the programs design and targeting assumptions look to be correct which confirms Terrain's strategy of identifying targets by using technical based staged exploration techniques. Terrain's geological team has used extensive mapping and ground-based geophysics as part of this process at Smokebush.

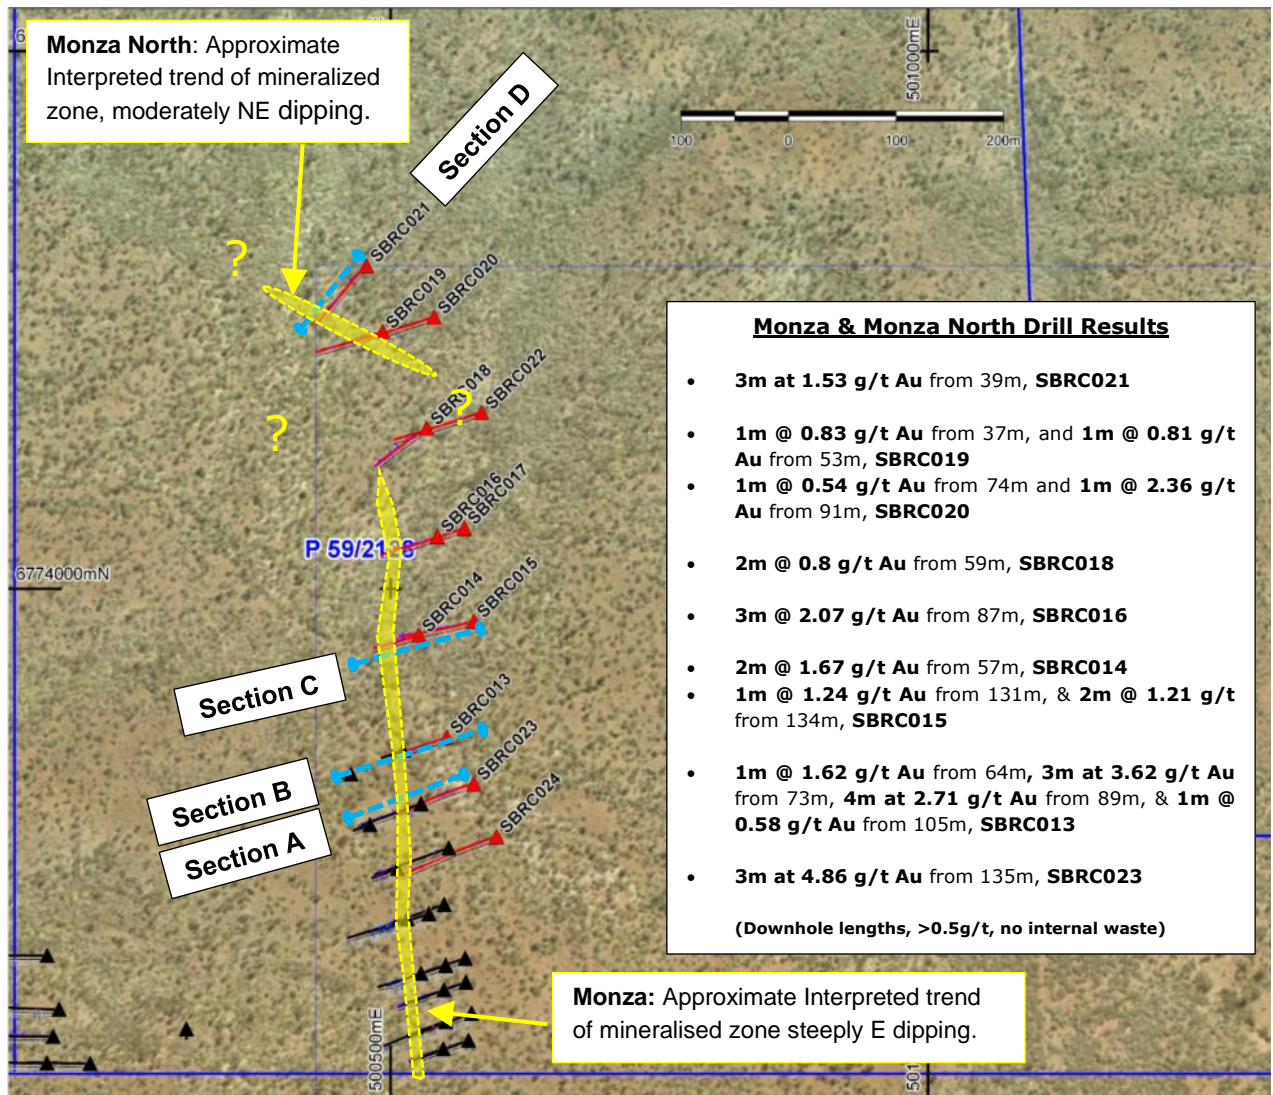

Diagram 5: Location of drill collars from 2021 RC drilling at Monza and newly identified structure at Monza North prospects, Smokebush Project. New drill traces are red with the hole ID labelled; historic drill traces are black (refer to diagram 6 for addition information on newly identified areas and diagrams 8 & 9 for conceptual geological interpretation of cross sections A & B).

Potential Follow-up Works Program

The last phase of the exploration (previously released) drill program has defined exciting new zones of gold mineralisation over a broad spatial area at Monza, Monza North and Paradise City. The next stage of exploration is now being investigated to better understand, test and target the interpreted extensional zones down dip, along trend at both Monza, Monza north, and along trend at Paradise City (Refer to diagrams 6 & 7).

A reconnaissance air core program has also been planned for testing regional mineralisation within the broader tenement package and may also be considered over these new areas.

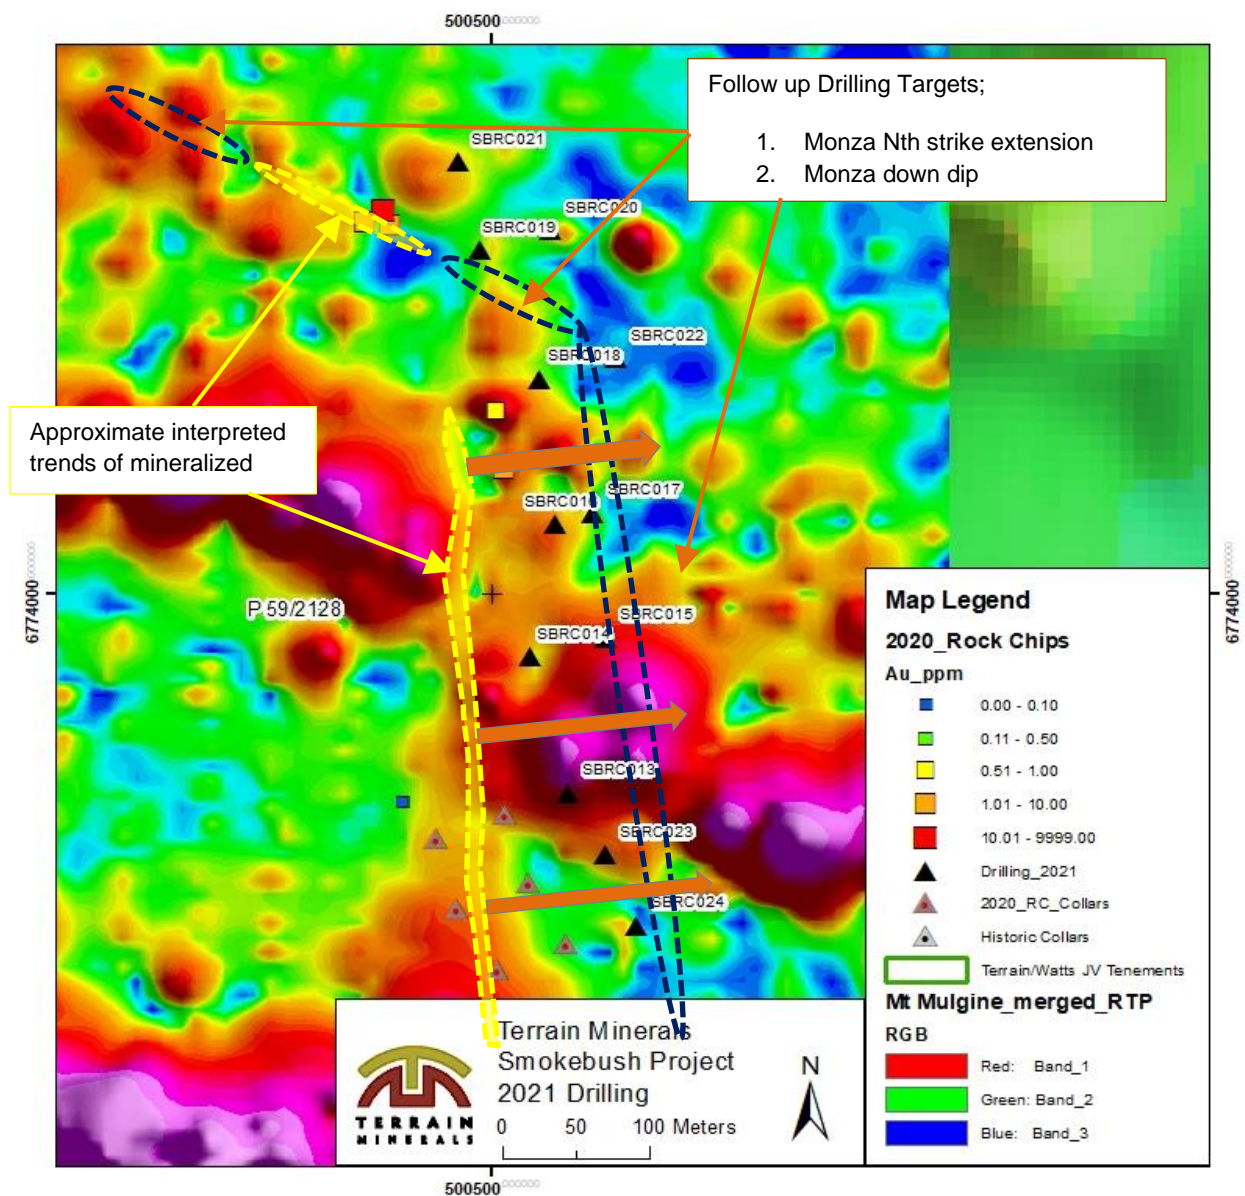

Diagram 6: Follow up Drill Target areas at Monza and Monza Nth (As magnetic Image).

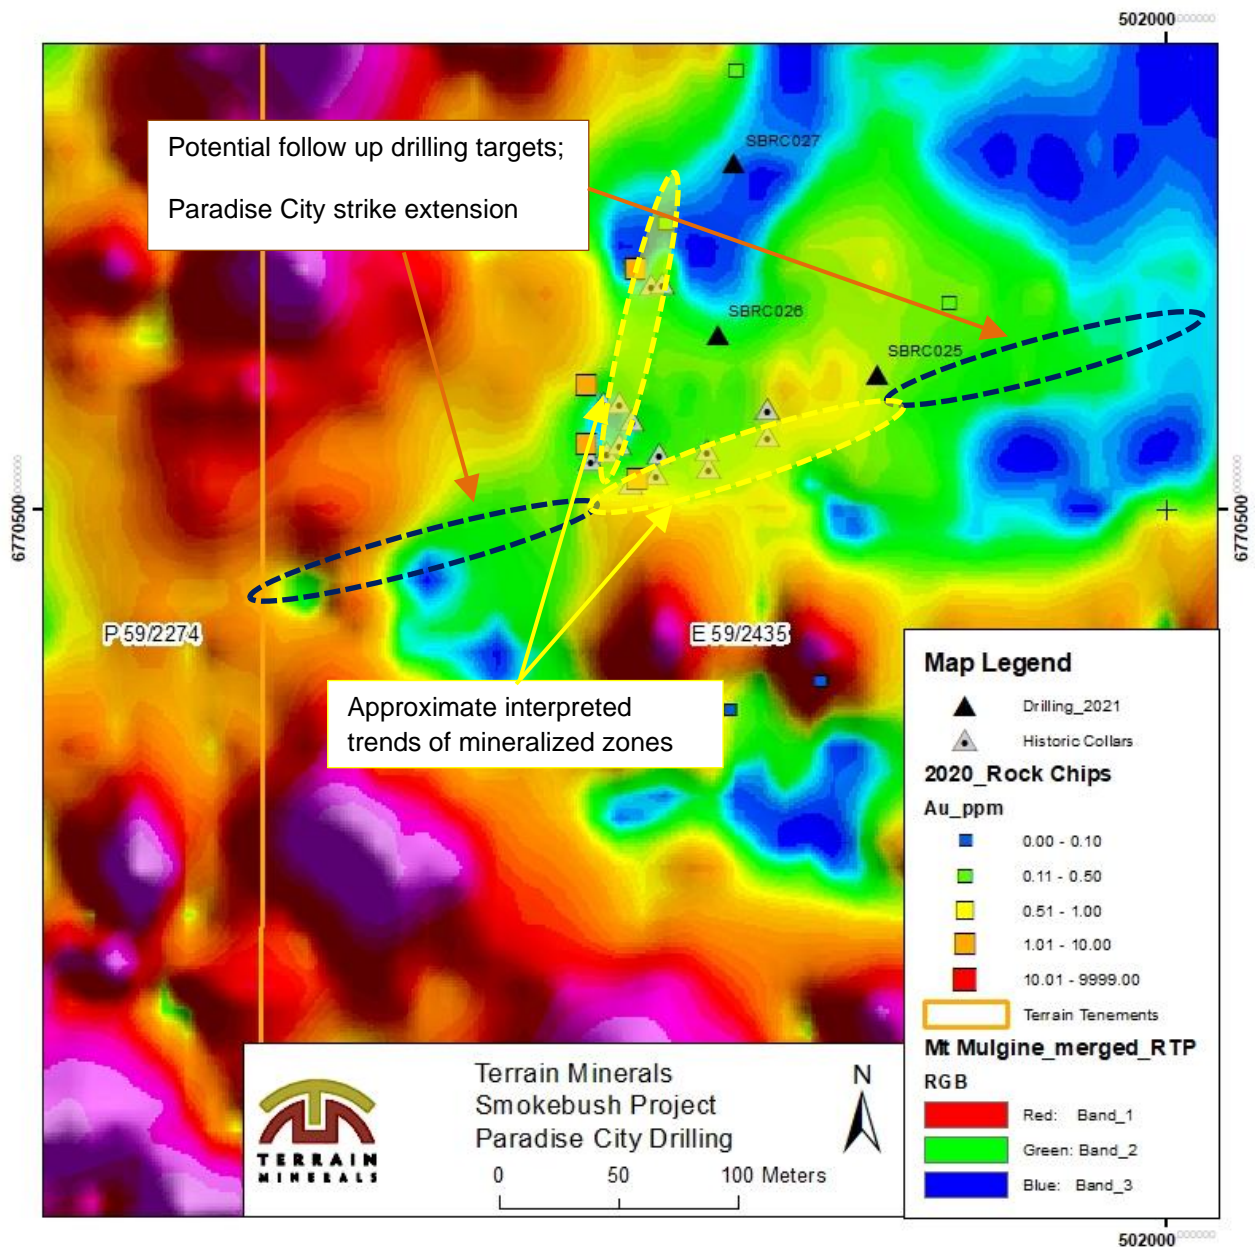

Diagram 7: Follow up Drill Target areas at Paradise City (As magnetic Image).

Geological Interpretation at Monza

Mineralisation at Monza occurs in variably altered (silica \pm sericite \pm muscovite \pm biotite \pm chlorite), weakly sheared dolerite proximal to felsic porphyry and pegmatite intrusives. The higher grade (> 0.5 g/t) intercepts occur where alteration is most intense and sulphide (pyrite \pm pyrrhotite \pm arsenopyrite \pm chalcopyrite \pm stibnite) mineralisation is strong (generally $+ 10\%$). These zones commonly occur within broader zones with weaker alteration, sulphide mineralisation and lower grades. The anomalous grade zones (>0.1 g/t) indicate potential for larger scale controls within the Monza mineralisation system. A schematic interpretation of the mineralised system at Monza is included below (Refer to diagrams 8 & 9) below drilling results previously released.

Anomalous zone halos (downhole lengths, Au grade > 0.1 g/t) include;

- 12 m @ 1.42 g/t Au from 127 m within drillhole SBRC023.
- 7 m @ 1.77 g/t Au from 72 m, and 8 m @ 1.44 g/t Au from 89 m within drillhole SBRC013.

Alteration zone halos (downhole lengths, length of sulphides and/or alteration including zones of internal barren material <0.1 g/t);

- 16 m @ 1.1 g/t Au in SBRC023 (includes 2 m of internal barren material < 0.1 g/t).
- 26 m @ 0.93 g/t in SBRC013 (includes 11 m of internal barren material < 0.1 g/t).

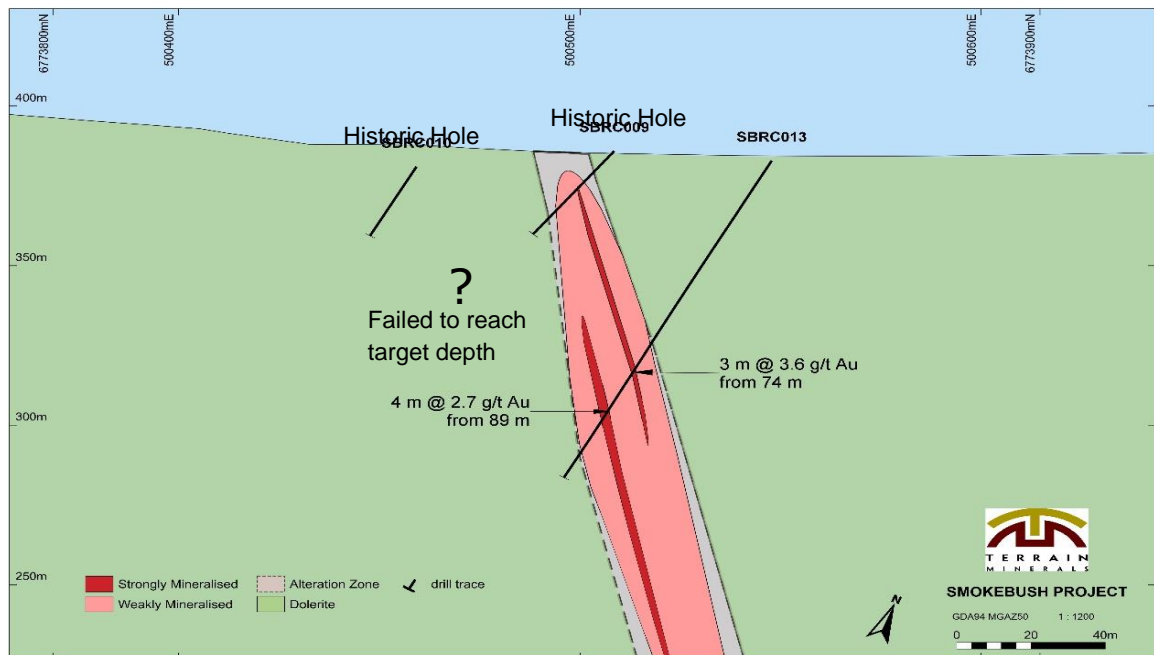

Diagram 8: Conceptual geological interpretation of section A.

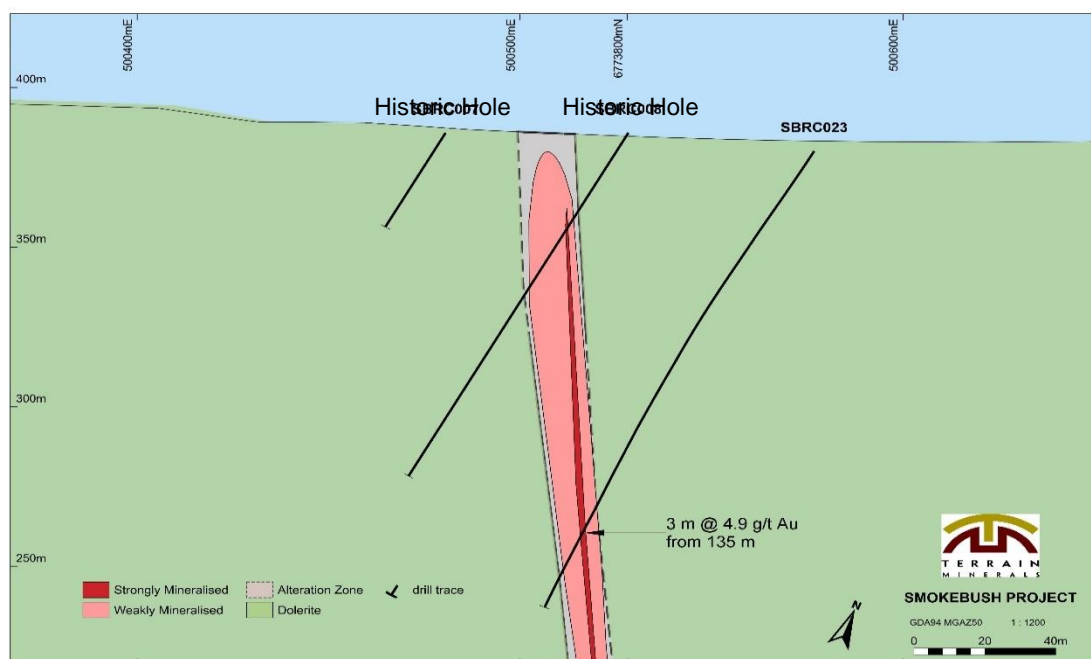

Diagram 9: Conceptual geological interpretation of section B.

Current Geological Interpretation at Monza

Terrains geological team has generated a new geological model which was released during the quarter which was generated from the new data set over Monza. It is important to remember that the Monza area of the project is still at a comparatively early stage of exploration. The drilling campaign conducted by Terrain in October 2020, confirmed the results from historic drilling and expanded known mineralisation down dip and along strike. In this drilling campaign, the northern most line of drillholes, intersected the hanging wall and the mineralised structure sat to the east of the drillholes.

In the follow up drilling campaign which commenced in April 2021, Terrains geological team repositioned and reoriented the target and consequently picked up the mineralisation again, adding a further 400m to the now 700m long mineralised zone.

The Monza structure appears structurally complex, with sigmoidal trend and variation in orientation, thickness and fabric intensity (refer to diagram 12).

At the northern end, drilling appears to have identified a new mineralised zone "Monza North" which may be separate from Monza (refer to diagrams 5, 6 & 13) and on a different orientation.

Terrain's geological team is planning next stages of exploration, including more field work to define and possibly conduct a regional drill program over Monza North, Wildflower and Hurley.

Monza RC Drill Planning

Mineralisation at Monza, sits within a N-S trending moderately steeply east dipping zone of foliation-alteration-sulphides (pyrite-arsenopyrite). This zone has a strike extent of 280m and contains approximately 120kT of mineralised material (assuming S.G of 2.6).

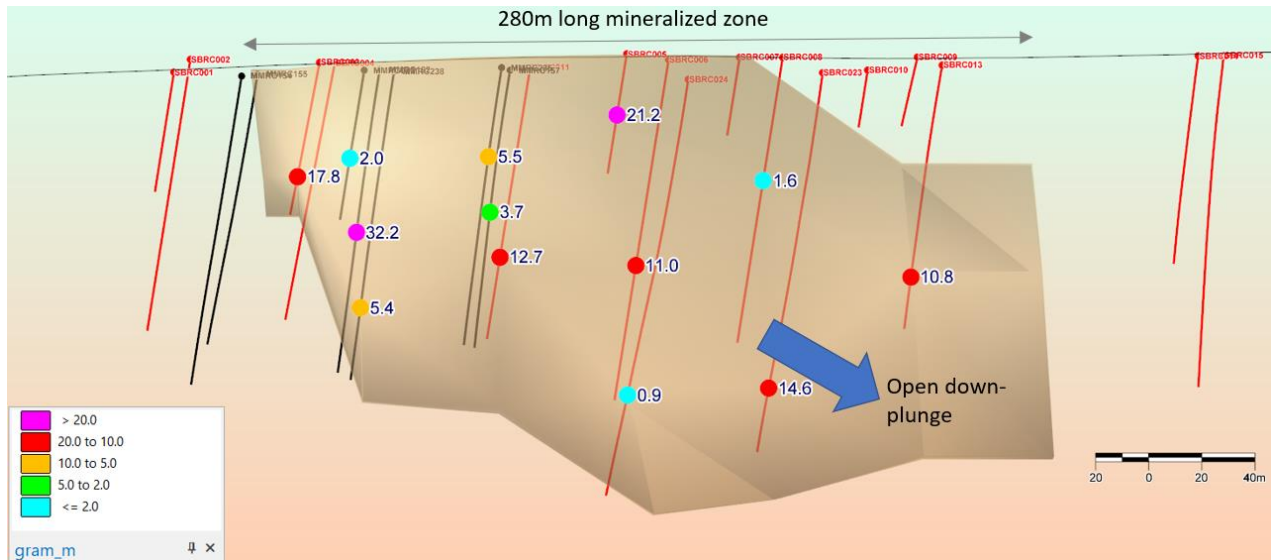

Diagram 10: Long section (looking West) displays the interpreted mineralised envelope with intercept positions and weighted grade (grams * meters) of intercepts within the interpreted shape.

The interpreted mineralised zone may be significantly expanded to the north where sparse drilling (100m x 50m) has identified numerous significant intercepts.

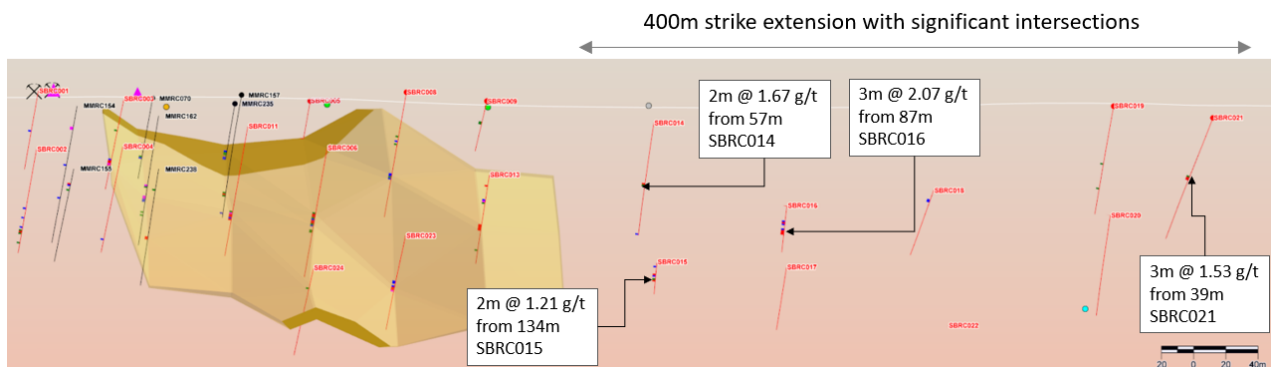

Diagram 11: Long section (looking West), Interpreted shape with significant intercepts outside of shape.

The Monza North mineralised zone that includes significant intersection of 3m @ 1.53 g/t Au, has a different orientation to the main zone. The mineralised structure at Monza North trends NW-SE and dips moderate-shallowly to the Northeast. This rotation of mineralisation orientation could be explained by fault-tip damage at a termination, or a relay in a step-over zone (see Diagram 12). Either of these scenarios indicate a structural complexity in this region (Monza North) of the mineralising system that may correspond to increased fluid flux.

Northern Zone Model

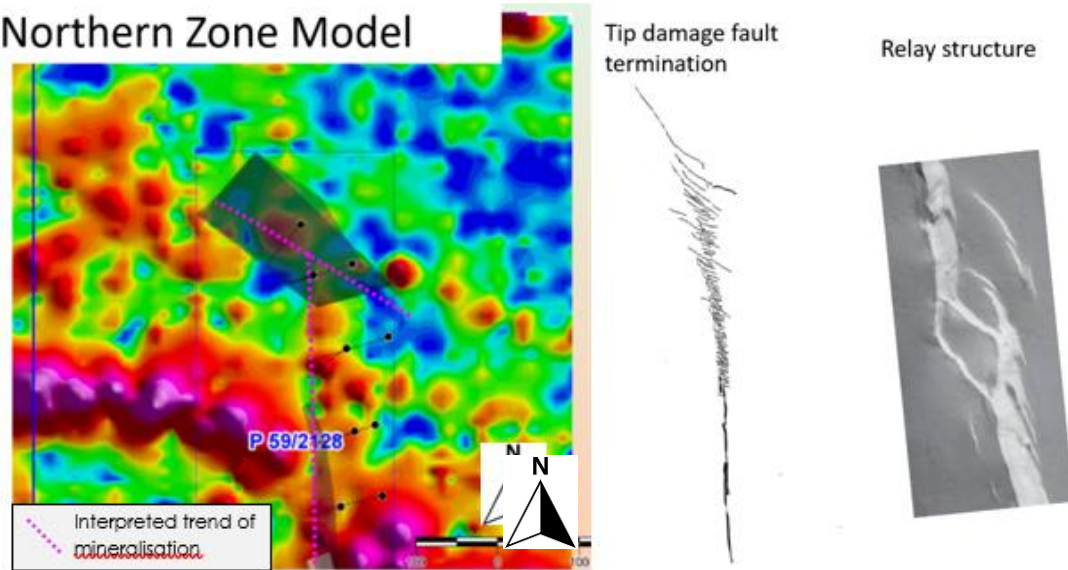

Diagram 12: Plan view of the Monza North area with surface trend of mineralisation compared with examples of fault terminations and relays (base map is magnetic TMI-AS)

The next phase of work at Monza is to evaluate the open extensions of the mineralising system to determine the orientation and extent of the entire mineralising system. There are three main zones where potential mineralisation extensions remain open;

- A. Down plunge extension of the main zone into magnetic host rock.
- B. Footwall of northern portion of the Main Zone.
- C. Strike extensions and potential repetitions of the Monza North structure.

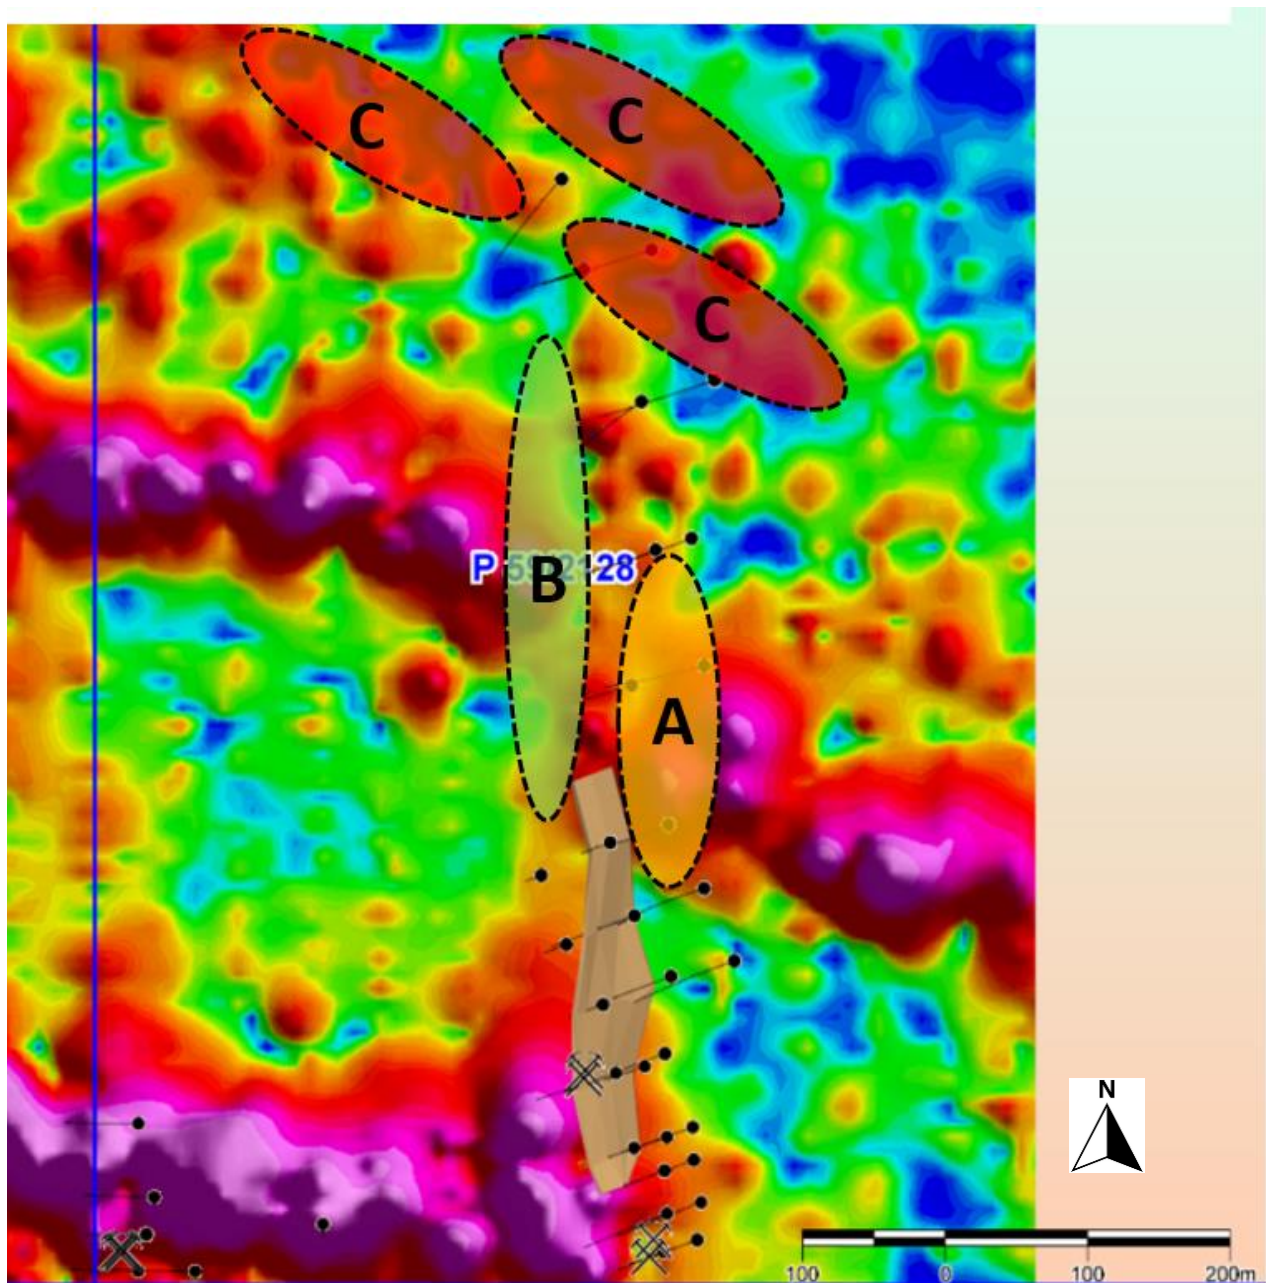

Diagram 13: Plan view of Monza and Monza North with target areas A, B & C highlighted (underlain by magnetic analytical signal image).

Note: For additional information refer to ASX announcement:

- **2 December 2019** - Farm-in Agreement for the Smokebush Gold Project at Mt Mulgine, 65km West of Paynes Find WA.
- **18 December 2019** - Smokebush Exceptional Historic Drilling Results Identified During Project Due Diligence.
- **3 March 2020** - Exciting Results from Smokebush Gold Project.
- **08 October 2020** - High Grade Rock Chips at Smokebush Gold Project.
- **12 October 2020** - Exciting Drilling Results at Smokebush Gold Project.
- **3 December 2020** - New Application Granted with Exciting Historic Results at the Paradise City Gold Prospect - Smokebush Gold Project.
- **12 February 2021** - Ground Geophysics & Mapping Refines Targeting Matrix at Smokebush Gold Project.
- **17 March 2021** - Drilling & Project Update - Smokebush Gold Project.
- **22 April 2021** - 2,100m RC Drilling Program Commenced at the Smokebush Gold Project.
- **27 May 2021** - New Rock Chip Samples & Drilling Update Smokebush Gold Project.
- **19 July 2021** - Positive First Pass Drilling Results Smokebush Gold Project.
- **13 September 2021** - New Geological Interpretation (Monza) & Exploration Update, Smokebush Gold Project.

Corporate

Share Investment

As of the date of this announcement, Terrain held 2 million Red 5 Limited shares (ASX: RED) from the Great Western gold deposit sale. Issued at 19c – current value at 28c = \$560,000 AUD.

Annual General Meeting

On 25 November 2021, the Company held its Annual General Meeting (AGM) of Shareholders. All resolutions were passed (see Picture 15).

Results of Annual General Meeting held at 8am WST on 25 November 2021 (Proxy Votes)

Picture 15: AGM Results

New Land Areas - Applications

Terrains geological team has commenced a new project generation and targeting strategy aimed at identifying new opportunist across strategic metals in Western Australia. The market will be updated as this strategy advances and hopefully generates positive outcomes.

Project Review

Terrain continues to search and assess potential 'company making' projects including Gold, Copper, Nickel and industrial minerals in Australia, Africa, North & South America, Asia, Europe, and other regions. Several jurisdictions of interest have been identified. All economic commodities are being considered as indicated in previous Quarterly reports.

Terrain is currently investigating several new opportunities, located in WA and offshore, which are now being assessed due to many countries reopening, this process has been the company's focus during the last Quarter. Geological assessment and discussion are ongoing on several opportunities. With one opportunity currently still out standing and is being pursued.

ABOUT TERRAIN MINERALS LIMITED:

Terrain Minerals Limited (ASX:TMX) is a minerals exploration company with a Western Australian based asset portfolio consisting of:

- **Investments** - As of the date of this announcement Terrain held 2 million Red 5 Limited shares (ASX: RED) from the GW sale. Issued at 19c - value at 28c = \$560,000 AUD. On top of its current cash levels.
- **Smokebush** - WA gold exploration Project JV (80% TMX) – Terrain has identified multiple drill targets along with several other prospective areas. Terrain executed its highly successful maiden RC drill program in August 2020, following up on historic drilling. The second phase of drilling has extended minerals a further 400m to 700m long and has also identified a new zone Monza Norths that appears to be on a different orientation. Further follow up work is also required over Paradise City (100% TMX), Wildflower and Hurley prospects with more mapping planned in 2022 before doing more drilling.
- **Wild-viper** - WA gold exploration Project 100% owned – which incorporates the strategic land holding known as Wilson Patch (WP). Wild-viper tenement package is strategically located and surrounds Red5 Ltd - Great Western Project (GW) as well as being adjacent to Saracen's (ASX: SAR) Bundarra gold deposits. Terrain's geologist conducted two site visits during the quarter following up on Terrain's new in-house geological interpretation.
- **Project Review** - Terrain Minerals continues to investigate potential projects across various commodities including Gold, Copper, Nickel, and other industrial minerals, REE and the platinoids groups of metals in Australia and again in other jurisdictions like Africa, Continental Europe, and the Americas. Terrain is currently advancing conversations and investigating several opportunities offshore. The current COVID-19 travel restrictions, appear to be easing globally and foreign travel may become more readily available in the near term.

Authority

This announcement has been authorised for release by the Board of Director of Terrain Minerals Limited.

Related Party Transactions

In accordance with ASX Listing Rule 5.3.5, payments to related parties of the Company and their associated during the quarter totalled \$69,000. Terrain advises that this relates to Executive Director salaries and entitlements and Non-Executive Director fees. Please refer to the Remuneration Report in the Annual Report for further details on Director remuneration.

Competent Person Statement:

The information in this report that relates to historic exploration activities are based on information compiled by Mr. S Nicholls, who is a Member of the Australian Institute of Geoscientists and full time employee of Apex Geoscience Australia Pty Ltd. Mr Nicholls has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Nicholls consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Compliance Statement:

The Company notes that within the announcement all the information is referenced directly to the relevant original ASX market releases of that technical data.

Terrain would like to confirm to readers that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, in the case of the estimates of mineral resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Disclaimer:

Information included in this release constitutes forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue” and “guidance” or other similar words, and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate environmental conditions including extreme weather conditions, staffing and litigation

Forward looking statements are based on the company and its management’s assumptions made in good faith relating to the financial, market, regulatory and other relevant environments that exist and effect the company’s business operations in the future. Readers are cautioned not to place undue reliance on forward looking statements.

Forward looking statements are only current and relevant for the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward-looking statements or advise of any change in events, conditions or circumstances on which such statement is based.

8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	1,035
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	5.25
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	<div style="border: 1px solid black; padding: 5px; min-height: 30px;"> Answer: N/A </div>	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	<div style="border: 1px solid black; padding: 5px; min-height: 30px;"> Answer: N/A </div>	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	<div style="border: 1px solid black; padding: 5px; min-height: 30px;"> Answer: Yes </div>	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 21 January 2022

Authorised by:

Board of Directors

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
